PROJECT TITLE : A CRM APPLICATION FOR THE CHAI SHOP & CO
DATE OF SUBMISSION: 28:09:2026

A CRM APPLICATION FOR THECHAI SHOP&CO

User Story:

As a sales representative at TheChaiShop&Co, I want to efficiently manage customer relationships and streamline sales processes using our CRM application.

I want to easily access and update employer details, as well as distinguish between online and offline customer records using record types, allowing for personalized interactions. Additionally, I need the application to automate sales calculations, such as order quantity and total bill amount, to ensure accurate and efficient transactions.

Moreover, I require the ability to generate insightful reports and dashboards to summarize and analyze sales data effectively, aiding in decision-making and strategy development. Lastly, I would like the application to automate email notifications to customers on their birthdays, informing them of special offers tailored to celebrate their special day, enhancing customer engagement and loyalty.

1. INTRODUCTION

1.1 Project Overview :

The project “A CRM Application for TheChaiShop&Co” focuses on developing a Salesforce-based Customer Relationship Management (CRM) system to manage customer, employer, and enterprise accounts efficiently. The system automates sales processes, maintains customer records, generates reports, and improves customer engagement through automated notifications.

The project user story and objectives are defined in the initial section of the document

1.2 Purpose :

The purpose of this project is to:

- Streamline customer relationship management
- Automate billing and order calculations

- Improve data accuracy
- Enable data-driven decision-making
- Enhance customer engagement through email automation

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Sales Representati ve	Manage customer orders and billing	Calculations are often incorrect	Order quantity and billing are manual	Stressed and inefficient
PS-2	Store Manager	Monitor sales and customer records	Reports are delayed and incomplete	Data is stored in multiple files	Confused and dissatisfied

PS-3	Customer	Receive personalized offers and updates	I do not get timely notifications	There is no automated communicat ion	Disconnecte d and undervalued
------	----------	--	---	---	-------------------------------------

Problem Statements – TheChaiShop&Co CRM Application

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1		Manage customer orders and billing	Calculations are often incorrect	Order quantity and billing are manual	
PS-2	 Sales Representative	Monitor sales and customer records	Reports are delayed and incomplete	Data is stored in multiple files	 Stressed and inefficient
PS-2		Monitor sales and customer records	Reports are delayed and incomplete	Data is stored in multiple files	 Confused and dissatisfied
PS-3	 Customer	Receive personalized offers and updates	I do not get timely notifications	There is no automated communication	 Disconnected and undervalued

2.2 Empathy Map Canvas

Target Users

- Sales Representatives
- Managers
- System Administrators
- Business Analysts

Empathy Analysis

Aspect	Description
Think & Feel	Need accurate customer data and reports
Hear	Feedback from management
See	Multiple registers and spreadsheets
Say & Do	Enter data manually

Pain	Errors, delays, data loss
Gain	Automation, fast reports

Brainstorming

Brainstormed Ideas

- Manual CRM system
- Excel-based management
- Web-based CRM
- Salesforce-based CRM
- Automated email system

Selected Idea:

Salesforce-based CRM Application for TheChaiShop&Co..

REQUIREMENT ANALYSIS PHASE

2.3 Customer Journey Map Journey

Stages:

- Login
- Access CRM Application
- Enter Customer Data
- Generate Orders
- Calculate Bills
- View Reports
- Decision Making

2.4 Solution Requirements

Functional Requirements

FR No	Requirement
FR-1	User Login

FR-2	Object Creation
FR-3	Data Entry
FR-4	Billing Automation
FR-5	Report Generation
FR-6	Email Automation

Non-Functional Requirements NFR-

1: Usability

The system should be easy to use for sales representatives, managers, administrators, and analysts without requiring technical training.

Requirements :

- Simple and intuitive user interface
- Clear navigation menus
- Easy-to-understand forms
- User-friendly dashboards

Example:

A new sales employee should be able to log in, enter customer details, and generate orders within a few minutes without help.

Salesforce Lightning UI provides drag-and-drop features and easy navigation.

[NFR-2: Security](#)

The system must protect customer and business data from unauthorized access.

Requirements:

- Role-based access control
- Secure login authentication
- Encrypted data storage
- Data backup and recovery

Examples:

- Profiles and permission sets
- Object-level and field-level security
- Restricted billing access
- Secure login and password policies

[NFR-3: Reliability](#)

The CRM system should work correctly at all times and store data accurately without loss.

Requirements:

- Automatic data saving
- Regular system backups
- Error handling mechanisms
- Stable cloud environment Example :

If a user enters order data and the internet disconnects, the system should save the information and restore it later.

Salesforce cloud ensures automatic backups.

NFR-4: Performance

The system should respond quickly and handle large amounts of data efficiently.

Requirements:

- Fast page loading
- Quick report generation
- Smooth dashboard rendering
- Minimal delay

Example: When a manager generates monthly sales reports for hundreds of customers, the report should load within 2–3 seconds.

Optimized queries and caching improve speed.

NFR-5: Availability

The system should be accessible whenever required.

Requirements:

- 24/7 system availability

- Minimal downtime
- Cloud-based hosting
- Disaster recovery

Example: Managers should be able to access the CRM system during peak business hours, weekends, or late nights.

Salesforce cloud provides high uptime.

NFR-6: Scalability

The system should support business growth without affecting performance.

Requirements:

- Ability to handle more users
- Support increasing customer data
- Expandable storage
- Maintain system speed

Example: If TheChaiShop&Co expands to multiple branches, the CRM system should support thousands of customers without slowing down.

Salesforce infrastructure automatically scales.

2.5 Data Flow Diagram

User → Salesforce UI → Custom Objects → Validation Rules → Flows → Reports → Dashboards.

2.6 Technology Stack

Layer	Technology
Frontend	Salesforce Lightning
Database	Salesforce Cloud
Automation	Flows
Backend	Salesforce Platform
Analytics	Reports & Dashboards

3. PROJECT DESIGN PHASE

3.1 Problem–Solution Fit

The CRM system replaces manual records with automated data management. Cloud storage prevents data loss, dashboards improve analysis, and real-time reports eliminate delays. This ensures accurate and timely business insights generation.

3.2 Proposed Solution

Functional Requirements

Parameter	Description
User Login & Authentication	Allows authorized users to securely log in to the CRM system using valid credentials.
Customer Record Management	Enables users to create, view, update, and delete customer details such as name, contact number, and address.

Employer & Enterprise Management	Allows management of employer and enterprise account information for business operations.
Order Management	Supports creation and tracking of customer orders, including order quantity and product details.
Automated Billing System	Automatically calculates total bill amount using formula fields based on order quantity and pricing.
Validation Rules	Ensures accurate data entry by validating fields such as phone number, PAN, and Aadhaar.
Record Types & Page Layouts	Provides different record types and layouts for various customer and enterprise categories.
Global Picklists	Maintains standardized values for fields such as product type, category, and status.
Email Notification System	Sends automated emails to customers for birthdays, offers, and order confirmations.
Workflow & Flow Automation	Automates tasks such as updating records and triggering alerts using Salesforce Flows.
Report Generation	Generates detailed reports on sales, customers, and enterprise performance.

Dashboard Visualization	Displays real-time analytics through interactive dashboards and charts.
Data Backup & Recovery	Ensures secure storage and recovery of business data in the Salesforce cloud.
User Role Management	Controls system access using profiles and permission sets for different users.

3.3 Solution Architecture

Architecture Layers

1. Presentation Layer – Lightning UI
2. Application Layer – Flows and Logic
3. Data Layer – Custom Objects
4. Analytics Layer – Reports and Dashboards

This layered architecture ensures modularity, scalability, and maintainability.

4. PROJECT PLANNING & SCHEDULING

4.1 Project Planning

- The project followed an Agile-based development approach with defined milestones and sprints.
- A Salesforce Developer account was created to set up the development environment.
- Custom objects were designed to store customer, employer, and enterprise data.
- Custom tabs and a Lightning Application were developed for easy system navigation.
- Fields, relationships, and global picklists were configured to ensure data consistency.
- Page layouts and record types were created based on user roles and customer categories.

Sprint-1	Data Modeling	USN-2	As an admin, I want to create Customer, Employer, and Enterprise objects so that business data can be stored and managed systematically.	3	High	Member2
Sprint-2	Data Modeling	USN-3	As a user, I want separate tabs for each object so that I can easily navigate and manage CRM records within the application.	3	High	Member3

- Validation rules were implemented to prevent incorrect data entry.
- Email templates and automated flows were developed for customer notifications. ●
- Reports and dashboards were created for performance monitoring and analysis.
- Regular sprint reviews and testing were conducted to track progress and resolve issues.
- The project was completed within the planned timeline through systematic scheduling.

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Member s
Sprint-1	Developer Setup	USN-1	As an admin, I want to create a Salesforce developer account so that I can configure and deploy the TheChaiShop&Co CRM application.	1	High	Member1

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-2	Data Modeling	USN-4	As a manager, I want a dedicated Lightning App so that all CRM operations are accessible from a single dashboard.	3	High	Member4
Sprint-2	Data Modeling	USN-5	As an admin, I want to create customer and order fields so that complete sales and billing details can be captured accurately.	5	Medium	Member1
Sprint-2	Data Modeling	USN-6	As a user, I want customized page layouts for different record types so that only relevant information is displayed during data entry	5	High	Member2
Sprint-2	Data Modeling	USN-7	As a manager, I want separate record types for Retail and Enterprise customers so that different business categories can be managed efficiently.	5	Medium	Member3
Sprint-3	Automation	USN-8	As a system, I want to validate customer details and order inputs so that incorrect data entries are prevented.	3	High	Member4
Sprint-3	Automation	USN-9	As a system, I want automated flows to send email notifications so that customers receive timely updates and offers.	5	High	Member1
Sprint-4	Automation	USN-10	As a system, I want to automatically calculate billing amounts so that invoices are generated without manual effort.	5	High	Member2
Sprint-5	Reports	USN-11	As a manager, I want sales and customer reports so that I can monitor business performance and make informed decisions.	4	High	Member3

Sprint-6	Dashboards	USN-12	As a manager, I want visual dashboards so that I can quickly analyze sales, customers, and enterprise performance.	4	Medium	Member4
----------	------------	--------	--	---	--------	---------

Project Tracker, Velocity & Burndown Chart: (4 Marks)	Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as Planned End Date)	Sprint Release Date (Actual)
	Sprint-1	20	6 Days	24 Oct 2022	29 Oct 2022	20	29 Oct 2022
	Sprint-2	20	6 Days	31 Oct 2022	05 Nov 2022		
	Sprint-3	20	6 Days	07 Nov 2022	12 Nov 2022		
	Sprint-4	20	6 Days	14 Nov 2022	19 Nov 2022		

5. Project Development Phase:

Project Flow

Milestone 1 : Creation of developer account

Milestone 2 : Object Creation

Milestone 3 : Tabs

Milestone 4 : The Lightning App

Milestone 5 : Global Picklist

Milestone 6 : Fields and Relationships Milestone 7 :

Creation of Page Layout Milestone 8 : Creation of

Record Types Milestone 9 : Validation rules

Milestone 10 : Email Templates Milestone

11 : Flows

Milestone 12 : Reports and Dashboards Milestone

13 : Conclusion

What you'll learn

1. Real Time Salesforce Project
2. Standard and Custom objects
3. Picklist Value sets
4. Types of Fields & their relationships.
5. Page Layouts
6. Record Types
7. Validation Rules
8. Email Templates
9. Flows
10. Reports and Dashboards.

Implementation

Milestone 1 - Salesforce developer account creation : Activity 1: Creating Developer Account:

Creating a developer org in salesforce.

1. Go to <https://developer.salesforce.com/signup>
2. On the sign up form, enter the following details :

Build for the Agentic Enterprise. Sign up for your Developer Edition.

The entire Salesforce platform - exposed as APIs, MCP tools, and CLI commands. Build apps, ship agents, and let coding agents do the heavy lifting with Salesforce Headless 360.

- ✓ Build AI agents with Agentforce, grounded in your data with Data 360
- ✓ Connect Claude Code, Cursor, or Codex to your org with hosted MCP
- ✓ Build in the browser with the Agentforce Vibes IDE - no setup required

Sign up for your Developer Edition

A free Salesforce Platform environment with Agentforce and Data 360

First name	Last name
SANTHOSH	T
Job title	Company
developer	Government thirumagal ...
Country/region	Work email
India	santhoshthirumalai01@...

☐ I agree to the [Main Services Agreement - Developer Services](#), [Salesforce Program Agreement](#), and [API Terms of Service](#)

Your free trial may be provisioned on or migrated to Hyperforce, Salesforce's public cloud infrastructure.

I acknowledge, as described in the Developer Documentation: (1) the Developer Edition includes autonomous and other generative AI features; and (2) Salesforce may limit use of

- 1) First name & Last name
- 2) Email
- 3) Role : Developer
- 4) Company : College or Company Name
- 5) Country : India
- 6) Postal Code : pin code
- 7) Username : should be a combination of your name and company This need not be an actual email id, you can give anything in that format :

username@organization.com

Click on sign me up after filling these.

Activity 2: Account Activation :

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may 5-10mins.

2. Click on Verify Account.
3. Give a password and answer a security question and click on change password.

Change Your Password

Enter a new password for **lead@sb.oom**.
Make sure to include at least:

- ✓ 8 characters
- ✓ 1 letter
- ✓ 1 number

* New Password
..... Good

* Confirm New Password
..... Match

Security Question
▼ In what city were you born?

* Answer
asdfghjkl

Change Password

- 4.
5. Then you will redirect to your salesforce setup page.

Milestone 2 - Objects

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.

2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.

3. On the Object Manager page, click Create | Custom Object.

Activity 1 : Employer Account Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.

- **Label** : Employer Account
- **Plural Label** : Employer Accounts
- Enter Record Name Label and Format

Record Name : Employer Account Name Data

Type : Text

- **In Optional features** : check the boxes for Allow Reports | Allow Activities | Track Field History.
- **Search Status** : check the box for Allow Search.
- Save

The screenshot shows the Salesforce Setup interface. At the top, there's a 'Developer Edition' badge and a search bar labeled 'Search Setup'. Below the navigation bar, the 'Object Manager' tab is selected. The main content area is titled 'SETUP > OBJECT MANAGER' and 'Employer Account'. On the left, a sidebar lists various configuration options: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, and Restriction Rules. The 'Details' section is expanded, showing a list of fields and their values:

Details	
Description	
API Name	Employer_Account__c
Custom	☒
Singular Label	Employer Account
Plural Label	Employer Accounts
Enable Reports	☐
Track Activities	☐
Track Field History	☐
Deployment Status	Deployed
Help Settings	Standard salesforce.com Help Window

Activity 2 : Customer Account Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.

- **Label** : Customer Account

- **Plural Label** : Customer Accounts
- Enter Record Name Label and Format
Record Name : Customer Account Name Data
Type : Text
- **In Optional features** : check the boxes for Allow Reports | Allow Activities
| Track Field History.
- **Search Status** : check the box for Allow Search. ● Save

Activity 3 : Enterprise Account Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.

- **Label** : Enterprise Account
- **Plural Label** : Enterprise Accounts
- Enter Record Name Label and Format
Record Name : Enterprise Account Name Data
Type : Text
- **In Optional features** : check the boxes for Allow Reports | Allow Activities
| Track Field History.
- **Search Status** : check the box for Allow Search.

- Save

Milestone 3 - Tabs

Activity 1 : Custom tabs creation

1. Go to setup page → type Tabs in Quick Find bar → click on tabs → New (under custom object tab)

2. Select Object(Employer Accounts) → Select the tab style → Next (Add to profiles page) keep it as default → Next (Add to Custom App) uncheck the include tab .
3. Make sure that the Append tab to users' existing personal customizations is checked.
4. Click save.
5. Repeat the same steps for Customer Accounts and Enterprise Accounts.

Milestone 4 - The Lightning App

Activity 1 : Create a lightning app

1. Go to setup page → search “app manager” in quick find → select “app manager”
→ click on New lightning App.

2. Fill the app name in app details and branding as follow App

Name : TheChaiShop&Co

Developer Name : Auto Populates

Add image optional (if you want to give any image you can otherwise not mandatory) -

Add Primary color Hex or leave it to default.

Then click Next.

7. Click Save & Finish.

Milestone 5 : Global Picklist

Activity 1 : Create Global Picklist

1. In Quick find box search for : Picklist value sets and click New.

- **Label :** Gender
- Name :** Auto Populates
- Values :** Male
Female
Others
- Click **Save & New**.

The screenshot shows the Salesforce Setup interface. The left sidebar has a search bar with 'picklist value sets' and a list of 'Objects and Fields' including 'Picklist Value Sets'. The main content area is titled 'Global Value Set' and contains the 'Global Value Set Edit' form. The form has three tabs: 'Save', 'Save & New', and 'Cancel'. The 'Information' section includes fields for 'Label' (Gender), 'Name' (Gender), and 'Description'. Below these is a 'Values' section with a text area containing 'Male', 'Female', and 'Others' separated by new lines. A red vertical line is visible on the left side of the 'Values' text area.

2. Create three more Global picklists following the same steps.

- **Label :** Items
- Name :** Auto populates
- Values :** Platinum Tea Powder Double

Help for this Page

Global picklist value sets let you share the values across objects. Base custom picklist fields on a global value set to inherit its values. The value set is restricted so users can't add unapproved values through the API.

Activity 1 : Create Custom fields for Employer Account

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup. 2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.
3. From the object manager page, In the Quick Find box, Search for the custom object you just created : **Employer Account**
4. From the sidebar, click Fields & Relationships. Notice that there are already some fields there. Those are the standard fields.
5. Click New to create a custom field. Tip: Before creating a new field, do a quick search to make sure a similar one doesn't already exist.

6. Next, choose a data type as Text. Choosing a data type helps you format the field input.

7. Click on next.

The screenshot shows the 'New Custom Field' wizard in Salesforce. The title is 'Employer Account New Custom Field'. A 'Help for this Page' link is in the top right. The wizard is at 'Step 2 of 4: Enter the details'. At the top right of the form are buttons for 'Previous', 'Next', and 'Cancel'. The form fields are: 'Field Label' with the value 'First Name', 'Length' with the value '25', 'Field Name' with the value 'First_Name', and an empty 'Description' field. A message above the 'Length' field says 'Please enter the maximum length for a text field below.'

Required : Check the box

Click on Next → Next → Save.

Milestone 7 : Page Layouts

For the personalized field view in Customer Accounts, let's create two page layouts Online orders and Walk-In orders.

Activity 1: Online Orders page layout

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.

2. Click on the Page Layouts → click New.

3. Page Layout Name : Online Orders and click Save.

4. Drag and Arrange all the required fields as shown below.

5. Click **Save**.

Activity 2: Walk-In Orders page layout

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.
2. Click on the Page Layouts → click New.
3. Page Layout Name : Walk-In orders and click save.
4. Drag and Arrange all the required fields as shown below.
5. Click **Save**.

The screenshot shows the Salesforce Setup interface. The top navigation bar includes the Salesforce logo, a search bar labeled "Search Setup", and several utility icons. Below the navigation bar, the "Setup" menu is expanded, showing "Home" and "Object Manager". The "Object Manager" dropdown is selected, leading to the "Customer Account" object page. The page title is "SETUP > OBJECT MANAGER Customer Account". On the left sidebar, the "Page Layouts" section is highlighted. The main content area displays the "Page Layouts" for the "Customer Account" object, showing 3 items sorted by Page Layout Name. The table lists the following page layouts:

PAGE LAYOUT NAME	CREATED BY	MODIFIED BY	
Customer Account Layout	SANTHOSH T, 9/23/2026, 11:41 PM	SANTHOSH T, 9/24/2026, 11:02 PM	▼
Online Orders	SANTHOSH T, 9/24/2026, 2:45 AM	SANTHOSH T, 9/24/2026, 11:54 PM	▼
Walk-In orders	SANTHOSH T, 9/25/2026, 12:02 AM	SANTHOSH T, 9/27/2026, 6:28 AM	▼

Milestone 8 - Record Types

To Differentiate the records and data stored in Customer Accounts, let's create two different Record Types.

Online orders and Walk-In orders.

Activity 1: Online Orders Record Type

1. Go to the setup page → click on object manager → From drop down click edit for

Customer Account object.

2. Click on the Record Types → click New.

3. Enter Details :

Existing Record Type : Master Record

Type Label : Online Order

Record Type Name : Auto Populates

Active : Tick the checkbox

Click Next

4. In Assign Page Layouts

Select the page layout that users with this profile see for records with this record type. After saving, choose the picklist values that are available with this record type.

☒ Apply one layout to all profiles ☐ Apply a different layout for each profile

Online Orders ▼

Select

Apply one layout to all profiles : select **Online orders** from the drop down menu.

5. Click **Save and New**.

Activity 2: Walk-In Orders Record Type

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.

2. Click on the Record Types → click New.

3. Enter Details :

Existing Record Type : Master Record

Type Label : Walk-In Order Record

Type Name : Auto Populates Active :

Tick the checkbox Click

Next

4. In Assign Page Layouts

- Select Apply one layout to all profiles : select **Walk-In orders** from the drop down menu.

5. Click **Save**.

```
AND(
NOT(ISBLANK( Phone_Number__c )), NOT(REGEX(
Phone_Number__c , "[1-9]{10}$")), NOT(REGEX(
Phone_Number__c , "^\d+$"))
)
```

Error Message :

The phone number field must not be blank.
The phone number must consist of exactly 10 digits. The phone number must contain only numeric digits (no

spaces, dashes, parentheses, etc.)

4. Click **Save**.

The screenshot shows the Salesforce 'Customer Account Validation Rule' configuration page. On the left is a sidebar with navigation links: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, and Search Layouts. The main content area is titled 'Customer Account Validation Rule' with a 'Back to Customer Account' link. Below the title is a 'Validation Rule Detail' section with 'Edit' and 'Clone' buttons. The rule is named 'Phone_Number', is active (indicated by a checkmark), and has the error condition formula: `AND( NOT(ISBLANK( Phone_Number__c )), NOT(REGEX( Phone_Number__c , "[1-9]{10}$")), NOT(REGEX( Phone_Number__c , "^\\d+$")) )`. The error message is: 'The phone number field must not be blank. The phone number must consist of exactly 10 digits. The phone number must contain only numeric digits (no spaces, dashes, parentheses, etc.)'. The error location is 'Top of Page'. The description field is empty. At the bottom, it shows 'Created By' and 'Modified By' as 'sumithra R.' on 9/23/2026 at 11:03 AM, with 'Edit' and 'Clone' buttons.

Activity 3: On Enterprise Account

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.
2. Click on the validation rule → click New.
3. **Enter Rule Name** : Phone Number

Error Condition Formula :

```
AND(  
  NOT(ISBLANK( Phone_Number__c )), NOT(REGEX(  
    Phone_Number__c , "[1-9]{10}$")), NOT(REGEX(  
      Phone_Number__c , "^\\d+$"))  
)
```

Error Message :

The phone number field must not be blank.
The phone number must consist of exactly 10 digits. The phone
number must contain only numeric digits (no

spaces, dashes, parentheses, etc.)

4. Click **Save**.

The screenshot shows the 'Enterprise Account Validation Rule' configuration page in Salesforce. The left sidebar contains a navigation menu with options: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, and Search Layouts. The main content area is titled 'Enterprise Account Validation Rule' and includes a 'Back to Enterprise Account' link. Below the title is the 'Validation Rule Detail' section, which includes 'Edit' and 'Clone' buttons. The rule details are as follows:

Rule Name	Phone_Number	Active	✓
Error Condition Formula	AND(NOT(ISBLANK(Phone_Number__c)), NOT(REGEX(Phone_Number__c , "[1-9]{10}\$")), NOT(REGEX(Phone_Number__c , "^(d+\$")))		
Error Message	The phone number field must not be blank. The phone number must consist of exactly 10 digits. The phone number must contain only numeric digits (no spaces, dashes, parentheses, etc.)		Error Location: Top of Page
Description

At the bottom of the rule details, there are 'Edit' and 'Clone' buttons.

Milestone 10 - Email Template

Activity 1: Email Template

1. Go to setup, In quick find box enter Email template → click on classic Email Template.
2. Click on→ New Email Template
3. \

The screenshot shows the Salesforce Setup page. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. A search bar contains the text 'email templa'. Below the search bar, the 'Email' section is expanded, showing 'Classic Email Templates' and 'Lightning Email Templates'. The 'Classic Email Templates' section is highlighted. On the right side, there is a 'Classic Email Templates' header with a 'New Template' button. Below this, a table lists email templates with columns: Action, Email Template Name, Template Type, Available For Use, Description, Author, and Last Modified. The table is currently empty.

4. Choose the type of email template you would like to create : **Text** and click **Next**.

Step 1. Email Template: New Template

NOTE :

1. Make sure that the Default workflow user is assigned.

Milestone 11 - Flows

Let's create a scheduled Triggered flow to automate the Birthday offer mails.

Activity 1: Schedule Triggered Flow

1. Go to setup, Type Flow in quick find box → Click on the Flow and Select the New Flow.

2. Select Schedule - Triggered Flow and click Create.

3. Set a Schedule

Start Date : Enter the Date, when you want to start the flow. **Start**

Time : Enter the Time, when you want to start the flow. **Frequency :**

Daily

4. *Create Object*

Object : Customer Account

Condition Requirements : All conditions Are Met (AND)

- Field : Date_of_Birthday_is_today_c
Operator : Equals
Value : \$GlobalConstant.True
- Field : Email_ID_c
Operator : IS NULL
Value : \$GlobalConstant.False

5. Click (+) Icon on the flow builder and Select **Action Component**.

The screenshot displays the Salesforce Flow Builder interface. The main canvas shows a flow starting with a 'Start' node (labeled 'Mon, Sep 7, 2026, 12:30:00 AM, Daily') and ending with an 'End' node. A plus icon is positioned between the two nodes. The right-hand panel, titled 'Choose Object and Filter Conditions', is open. It shows the object 'Customer Account' and two conditions: 'Date of Birthday is today?' (Operator: Equals, Value: True) and 'Email ID' (Operator: Is Null, Value: False). The bottom-left panel shows the 'Add Element' menu with 'Action' selected under the 'Interaction' category.

6. In New Action Page

Filter By : Type and select Email Alert

In Action : Search and select Happy Birthday email alert

Label : Send Happy Birthday Email

API Name : Auto Populates

Set Input Values for the Selected Action : Record ID : `{!$Record.Id}`

The screenshot displays a workflow editor interface. On the left, a vertical flow diagram shows a sequence of steps: a connector with a plus sign, followed by a step labeled 'send happy birthday email' with an email icon and 'Email Alert' text, another connector with a plus sign, and finally an 'End' step with a red square icon. Above the flow, a header box contains 'Frequency: **Daily**', 'Object: **Customer Account**' (with an 'Edit' link), and 'Conditions: 2'. Below the flow are four small icons: a minus sign, a double arrow, a plus sign, and a menu icon.

On the right, a configuration panel titled 'Happy Birthday email alert' (with a back arrow and a close 'X' button) contains the following fields:

- '* API Name' with the value 'send_happy_birthday_email'.
- 'Description' with an empty text area.
- A note: 'Use values from earlier in the flow to set the inputs for the use its outputs later in the flow, store them in variables.'
- 'Set Input Values' section with a field for 'Record ID' (marked with 'A_a' and an info icon) containing the expression 'A_a ... Customer_Account__c > Record ID'.
- A link at the bottom: '> Show advanced options'.

7. Click **Done**.

MILESTONE 12 – CONCLUSION

In conclusion, the development of **TheChaiShop&Co CRM Application** marks a significant stride in enhancing the store's operational efficiency and customer relationship management capabilities.

Seamlessly integrating employer details, customer information (both online and offline), and enterprise data, this application streamlines business processes and enables informed decisionmaking.

The automation of sales calculations, including order quantity and total bill amount, reduces errors and empowers employees to focus on delivering exceptional service. Moreover, automated email notifications for customers' birthdays foster personalized communication and enhance customer engagement.

1. FUNCTIONAL & PERFORMANCE TESTING

During the testing phase, screenshots were captured from the **Salesforce Lightning interface** to verify correct system behavior. These include:

- Record creation for **Employer, Customer, and Enterprise** objects.
- Validation rule testing for **Aadhar, PAN, and phone numbers**.
- Verification of **record types and page layouts**.
- Formula field validation for **order quantity and billing**.
- Flow execution for **birthday email alerts**.
- **Report and dashboard** generation.

Performance testing ensured **fast response time and system stability during concurrent usage**.

2. ADVANTAGES & DISADVANTAGES

Advantages

- Centralized data management
- Reduced manual work
- Automated calculations
- Improved customer engagement
- Real-time analytics

Disadvantages

- Requires Salesforce license
- Internet dependency
- Limited offline access

3. CONCLUSION

The **CRM Application for TheChaiShop&Co** successfully improves business operations by integrating customer data, automating billing, and enabling intelligent reporting.

The system reduces errors, saves time, and enhances customer relationships through automation and analytics.

4. FUTURE SCOPE

The future scope of the CRM application includes:

- Mobile CRM integration
- AI-based sales prediction
- WhatsApp/SMS alerts
- Inventory management
- Multi-branch support
- Advanced customer profiling
