PROJECT TITLE : A CRM APPLICATION FOR THE CHAI SHOP & CO

DATE OF SUBMISSION: 28:09:2026

A CRM APPLICATION FOR THECHAI SHOP&CO

User Story:

As a sales representative at TheChaiShop&Co, I want to efficiently manage customer relationships and streamline sales processes using our CRM application.

I want to easily access and update employer details, as well as distinguish between online and offline customer records using record types, allowing for personalized interactions. Additionally, I need the application to automate sales calculations, such as order quantity and total bill amount, to ensure accurate and efficient transactions.

Moreover, I require the ability to generate insightful reports and dashboards to summarize and analyze sales data effectively, aiding in decision-making and strategy development. Lastly, I would like the application to automate email notifications to customers on their birthdays, informing them of special offers tailored to celebrate their special day, enhancing customer engagement and loyalty.

1. INTRODUCTION

1.1 Project Overview :

The project “A CRM Application for TheChaiShop&Co” focuses on developing a Salesforce-based Customer Relationship Management (CRM) system to manage customer, employer, and enterprise accounts efficiently. The system automates sales processes, maintains customer records, generates reports, and improves customer engagement through automated notifications.

The project user story and objectives are defined in the initial section of the document

1.2 Purpose :

The purpose of this project is to:

- Streamline customer relationship management

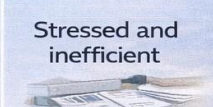

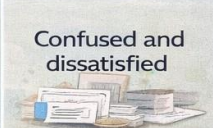

- Automate billing and order calculations
- Improve data accuracy
- Enable data-driven decision-making
- Enhance customer engagement through email automation

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Sales Representative	Manage customer orders and billing	Calculations are often incorrect	Order quantity and billing are manual	Stressed and inefficient
PS-2	Store Manager	Monitor sales and customer records	Reports are delayed and incomplete	Data is stored in multiple files	Confused and dissatisfied
PS-3	Customer	Receive personalized offers and updates	I do not get timely notifications	There is no automated communication	Disconnected and undervalued

Problem Statements – TheChaiShop&Co CRM Application

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1		Manage customer orders and billing	Calculations are often incorrect	Order quantity and billing are manual	
PS-2	 Sales Representative	Monitor sales and customer records	Reports are delayed and incomplete	Data is stored in multiple files	 Stressed and inefficient
PS-2	 Sales Representative	Monitor sales and customer records	Reports are delayed and incomplete	Data is stored in multiple files	 Confused and dissatisfied
PS-3	 Customer	Receive personalized offers and updates	I do not get timely notifications	There is no automated communication	 Disconnected and undervalued

2.2 Empathy Map Canvas

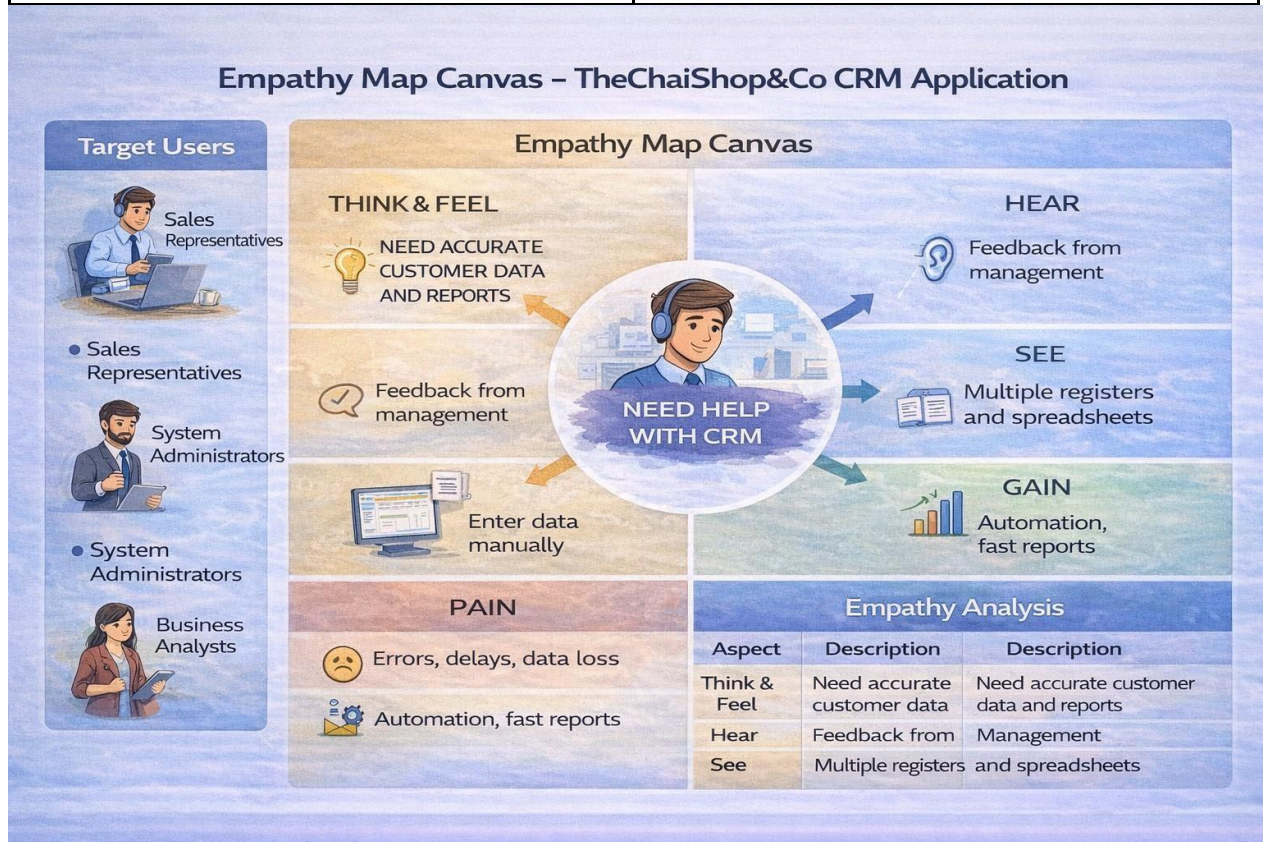

Target Users

- Sales Representatives
- Managers
- System Administrators
- Business Analysts

Empathy Analysis

Aspect	Description
Think & Feel	Need accurate customer data and reports

Hear	Feedback from management
See	Multiple registers and spreadsheets
Say & Do	Enter data manually
Pain	Errors, delays, data loss
Gain	Automation, fast reports

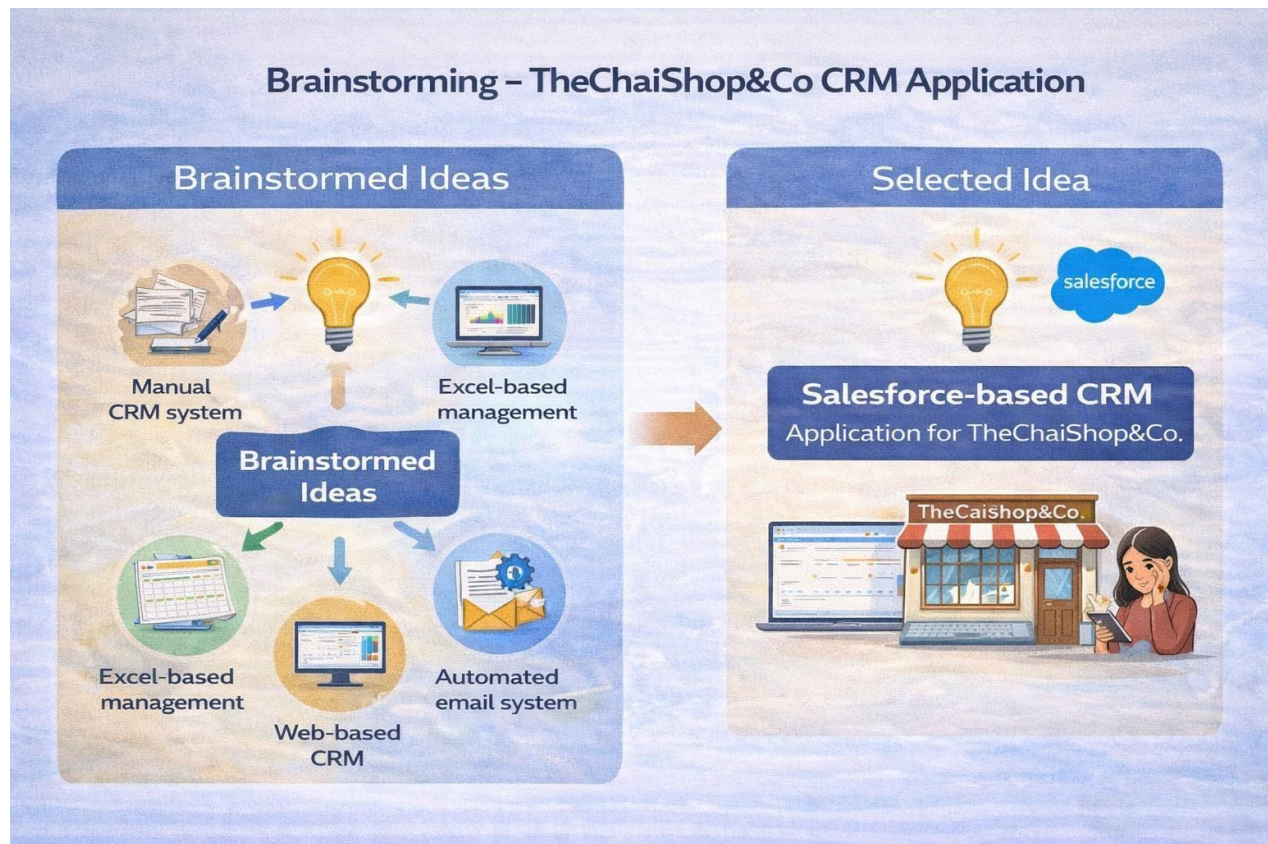

Brainstorming

Brainstormed Ideas

- Manual CRM system
- Excel-based management
- Web-based CRM
- Salesforce-based CRM
- Automated email system

Selected Idea:

Salesforce-based CRM Application for TheChaiShop&Co..

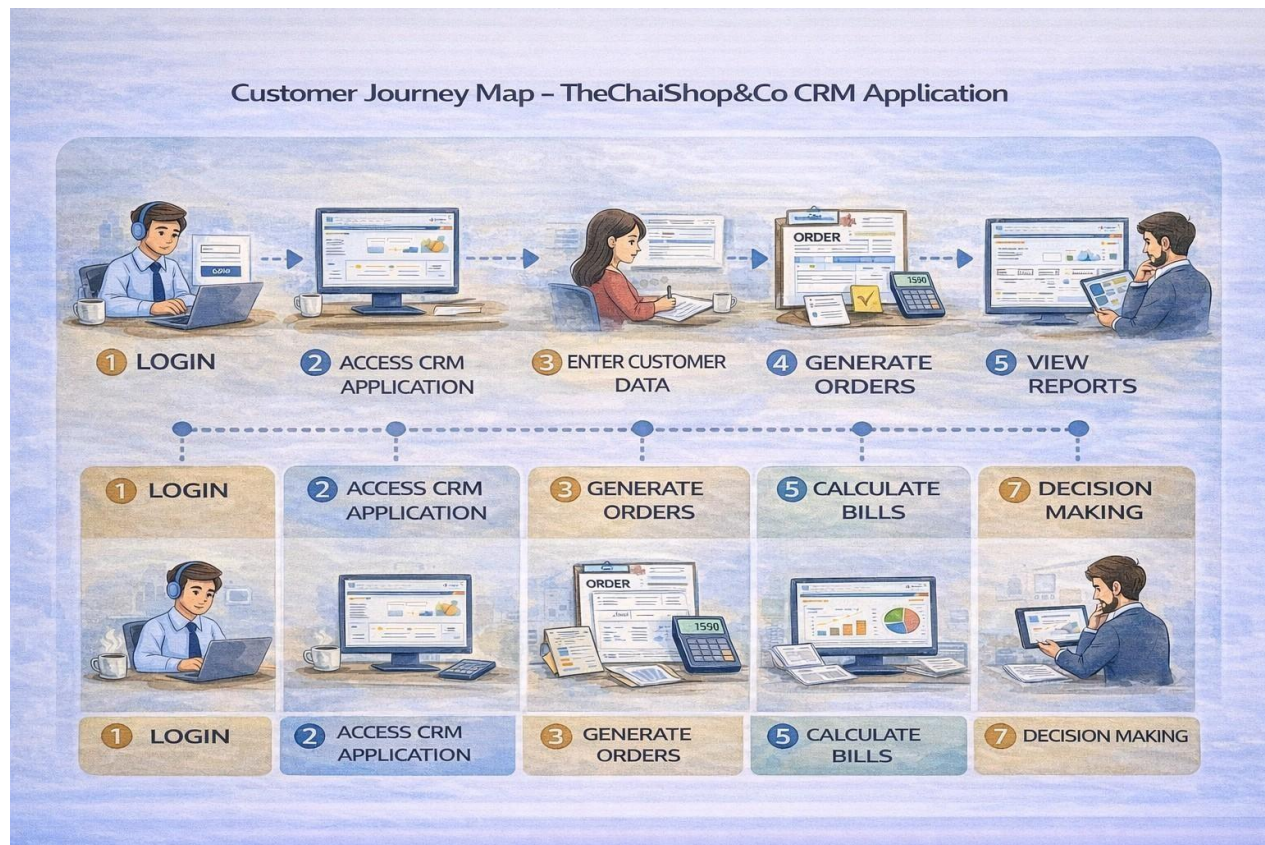

REQUIREMENT ANALYSIS PHASE

2.3 Customer Journey Map

Journey Stages:

- Login
- Access CRM Application
- Enter Customer Data
- Generate Orders
- Calculate Bills
- View Reports
- Decision Making

2.4 Solution Requirements

Functional Requirements

FR No	Requirement
FR-1	User Login

FR-2	Object Creation
FR-3	Data Entry
FR-4	Billing Automation
FR-5	Report Generation
FR-6	Email Automation

Non-Functional Requirements NFR-

1: Usability

The system should be easy to use for sales representatives, managers, administrators, and analysts without requiring technical training.

Requirements :

- Simple and intuitive user interface
- Clear navigation menus
- Easy-to-understand forms
- User-friendly dashboards

Example:

A new sales employee should be able to log in, enter customer details, and generate orders within a few minutes without help.

Salesforce Lightning UI provides drag-and-drop features and easy navigation.

NFR-2: Security

The system must protect customer and business data from unauthorized access.

Requirements:

- Role-based access control
- Secure login authentication
- Encrypted data storage
- Data backup and recovery

Examples:

- Profiles and permission sets
- Object-level and field-level security
- Restricted billing access
- Secure login and password policies

NFR-3: Reliability

The CRM system should work correctly at all times and store data accurately without loss.

Requirements:

- Automatic data saving
- Regular system backups
- Error handling mechanisms
- Stable cloud environment

Example :

If a user enters order data and the internet disconnects, the system should save the information and restore it later.

Salesforce cloud ensures automatic backups.

NFR-4: Performance

The system should respond quickly and handle large amounts of data efficiently.

Requirements:

- Fast page loading
- Quick report generation
- Smooth dashboard rendering
- Minimal delay

Example: When a manager generates monthly sales reports for hundreds of customers, the report should load within 2–3 seconds.

Optimized queries and caching improve speed.

NFR-5: Availability

The system should be accessible whenever required.

Requirements:

- 24/7 system availability
- Minimal downtime
- Cloud-based hosting
- Disaster recovery

Example: Managers should be able to access the CRM system during peak business hours, weekends, or late nights.

Salesforce cloud provides high uptime.

NFR-6: Scalability

The system should support business growth without affecting performance.

Requirements:

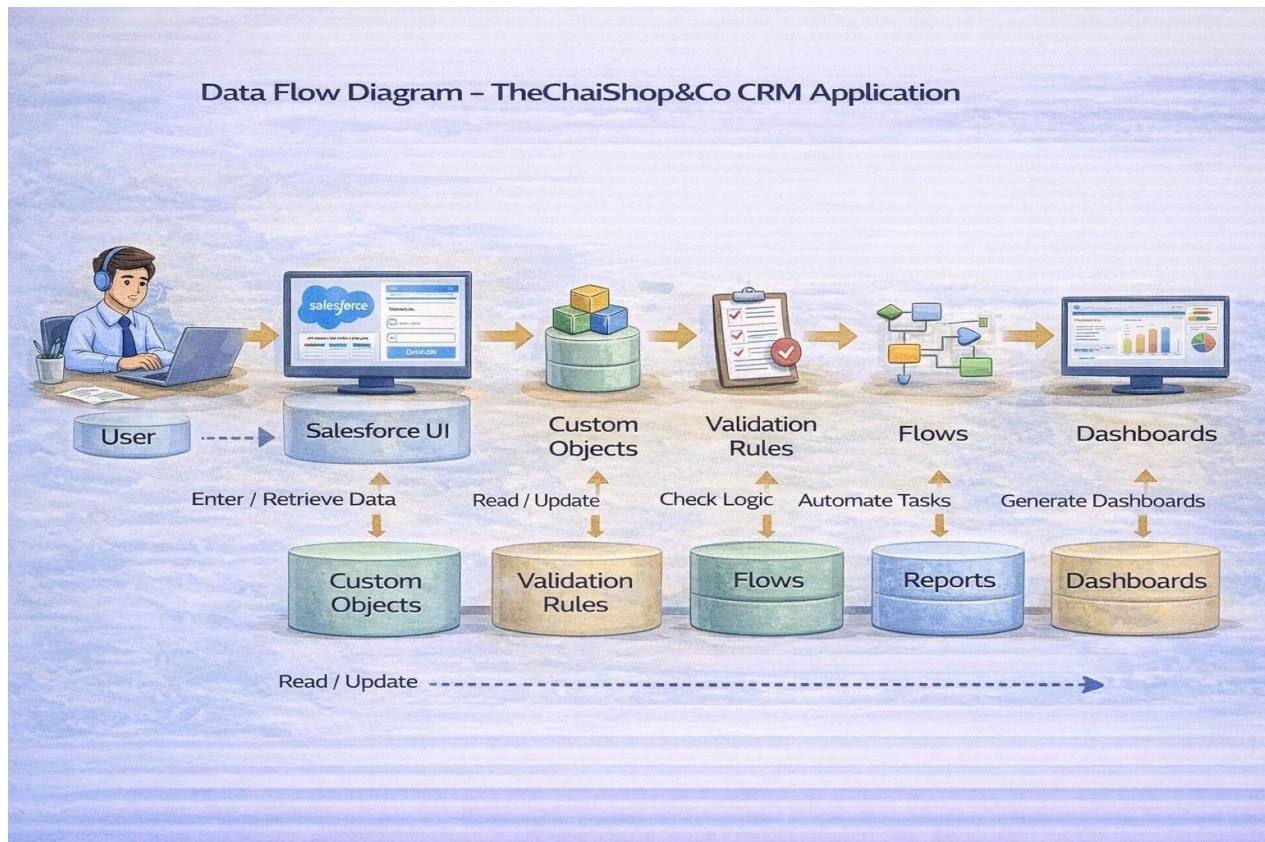

- Ability to handle more users
- Support increasing customer data
- Expandable storage
- Maintain system speed

Example: If TheChaiShop&Co expands to multiple branches, the CRM system should support thousands of customers without slowing down.

Salesforce infrastructure automatically scales.

2.5 Data Flow Diagram

User → Salesforce UI → Custom Objects → Validation Rules → Flows → Reports → Dashboards.

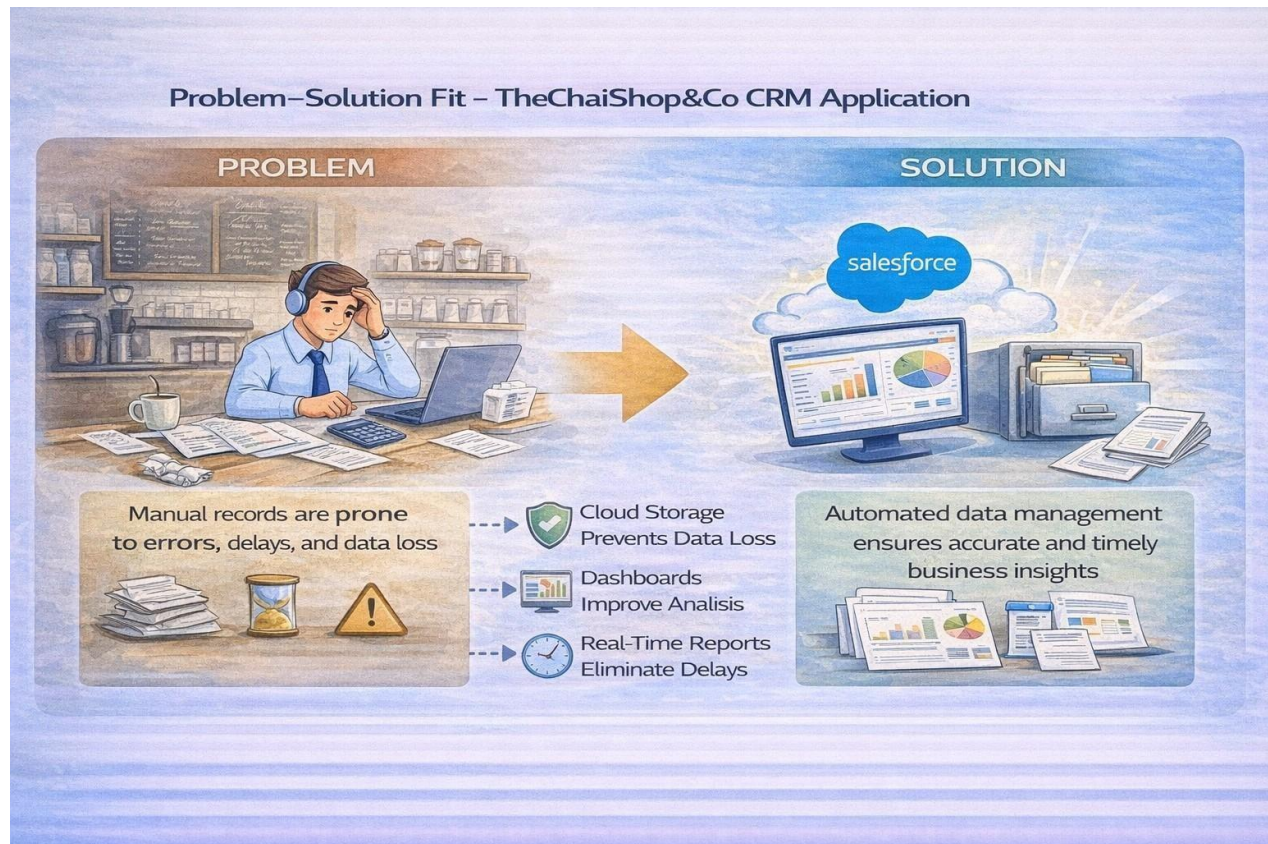

2.6 Technology Stack

Layer	Technology
Frontend	Salesforce Lightning
Database	Salesforce Cloud
Automation	Flows
Backend	Salesforce Platform
Analytics	Reports & Dashboards

3. PROJECT DESIGN PHASE

3.1 Problem–Solution Fit

The CRM system replaces manual records with automated data management. Cloud storage prevents data loss, dashboards improve analysis, and real-time reports eliminate delays. This ensures accurate and timely business insights generation.

3.2 Proposed Solution

Functional Requirements

Parameter	Description
User Login & Authentication	Allows authorized users to securely log in to the CRM system using valid credentials.
Customer Record Management	Enables users to create, view, update, and delete customer details such as name, contact number, and address.

Employer & Enterprise Management	Allows management of employer and enterprise account information for business operations.
Order Management	Supports creation and tracking of customer orders, including order quantity and product details.
Automated Billing System	Automatically calculates total bill amount using formula fields based on order quantity and pricing.
Validation Rules	Ensures accurate data entry by validating fields such as phone number, PAN, and Aadhaar.
Record Types & Page Layouts	Provides different record types and layouts for various customer and enterprise categories.
Global Picklists	Maintains standardized values for fields such as product type, category, and status.
Email Notification System	Sends automated emails to customers for birthdays, offers, and order confirmations.
Workflow & Flow Automation	Automates tasks such as updating records and triggering alerts using Salesforce Flows.
Report Generation	Generates detailed reports on sales, customers, and enterprise performance.
Dashboard Visualization	Displays real-time analytics through interactive dashboards and charts.
Data Backup & Recovery	Ensures secure storage and recovery of business data in the Salesforce cloud.

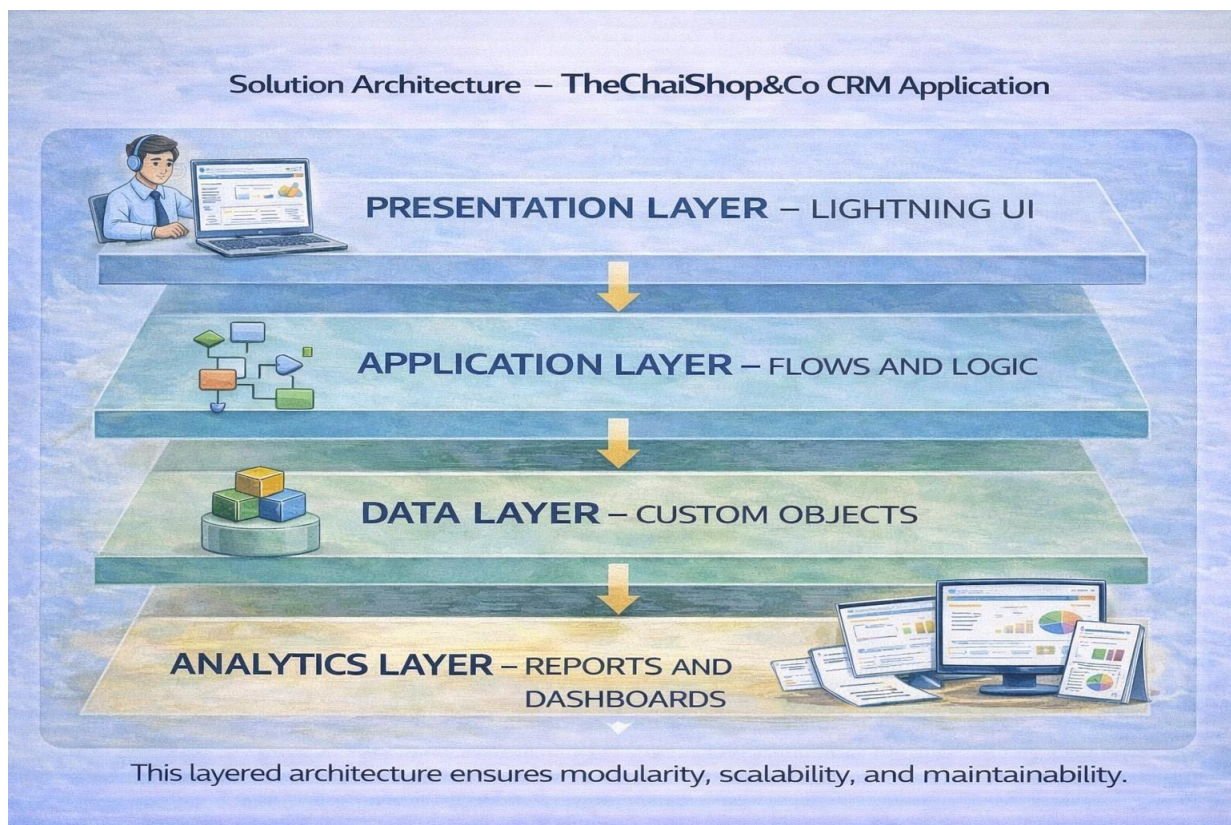

User Role Management	Controls system access using profiles and permission sets for different users.
----------------------	--

3.3 Solution Architecture

Architecture Layers

1. Presentation Layer – Lightning UI
2. Application Layer – Flows and Logic
3. Data Layer – Custom Objects
4. Analytics Layer – Reports and Dashboards

This layered architecture ensures modularity, scalability, and maintainability.

4. PROJECT PLANNING & SCHEDULING

4.1 Project Planning

- The project followed an Agile-based development approach with defined milestones and sprints.
- A Salesforce Developer account was created to set up the development environment.
- Custom objects were designed to store customer, employer, and enterprise data.
- Custom tabs and a Lightning Application were developed for easy system navigation.
- Fields, relationships, and global picklists were configured to ensure data consistency.
- Page layouts and record types were created based on user roles and customer categories.
- Validation rules were implemented to prevent incorrect data entry.
- Email templates and automated flows were developed for customer notifications. ● Reports and dashboards were created for performance monitoring and analysis.
- Regular sprint reviews and testing were conducted to track progress and resolve issues.
- The project was completed within the planned timeline through systematic scheduling.

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Member s
Sprint-1	Developer Setup	USN-1	As an admin, I want to create a Salesforce developer account so that I can configure and deploy the TheChaiShop&Co CRM application.	1	High	Member1

Sprint-1	Data Modeling	USN-2	As an admin, I want to create Customer, Employer, and Enterprise objects so that business data can be stored and managed systematically.	3	High	Member2
Sprint-2	Data Modeling	USN-3	As a user, I want separate tabs for each object so that I can easily navigate and manage CRM records within the application.	3	High	Member3

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-2	Data Modeling	USN-4	As a manager, I want a dedicated Lightning App so that all CRM operations are accessible from a single dashboard.	3	High	Member4
Sprint-2	Data Modeling	USN-5	As an admin, I want to create customer and order fields so that complete sales and billing details can be captured accurately.	5	Medium	Member1
Sprint-2	Data Modeling	USN-6	As a user, I want customized page layouts for different record types so that only relevant information is displayed during data entry	5	High	Member2
Sprint-2	Data Modeling	USN-7	As a manager, I want separate record types for Retail and Enterprise customers so that different business categories can be managed efficiently.	5	Medium	Member3
Sprint-3	Automation	USN-8	As a system, I want to validate customer details and order inputs so that incorrect data entries are prevented.	3	High	Member4
Sprint-3	Automation	USN-9	As a system, I want automated flows to send email notifications so that customers receive timely updates and offers.	5	High	Member1
Sprint-4	Automation	USN-10	As a system, I want to automatically calculate billing amounts so that invoices are generated without manual effort.	5	High	Member2
Sprint-5	Reports	USN-11	As a manager, I want sales and customer reports so that I can monitor business performance and make informed decisions.	4	High	Member3
Sprint-6	Dashboards	USN-12	As a manager, I want visual dashboards so that I can quickly analyze sales, customers, and enterprise performance.	4	Medium	Member4

Project	Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
	Sprint-1	20	6 Days	24 Oct 2022	29 Oct 2022	20	29 Oct 2022
	Sprint-2	20	6 Days	31 Oct 2022	05 Nov 2022		
	Sprint-3	20	6 Days	07 Nov 2022	12 Nov 2022		
	Sprint-4	20	6 Days	14 Nov 2022	19 Nov 2022		

Tracker, Velocity & Burndown Chart: (4 Marks)

5. Project Development Phase:

Project Flow

Milestone 1 : Creation of developer account

Milestone 2 : Object Creation

Milestone 3 : Tabs

Milestone 4 : The Lightning App

Milestone 5 : Global Picklist

Milestone 6 : Fields and Relationships Milestone 7 :

Creation of Page Layout Milestone 8 : Creation of

Record Types Milestone 9 : Validation rules

Milestone 10 : Email Templates Milestone

11 : Flows

Milestone 12 : Reports and Dashboards Milestone

13 : Conclusion

What you'll learn

1. Real Time Salesforce Project
2. Standard and Custom objects
3. Picklist Value sets
4. Types of Fields & their relationships.
5. Page Layouts
6. Record Types
7. Validation Rules
8. Email Templates
9. Flows
10. Reports and Dashboards.

Implementation

Milestone 1 - Salesforce developer account creation : Activity 1: Creating Developer Account:

Creating a developer org in salesforce.

1. Go to <https://developer.salesforce.com/signup>
2. On the sign up form, enter the following details :

Build for the Agentic Enterprise. Sign up for your Developer Edition.

The entire Salesforce platform - exposed as APIs, MCP tools, and CLI commands. Build apps, ship agents, and let coding agents do the heavy lifting with Salesforce Headless 360.

- ✓ Build AI agents with Agentforce, grounded in your data with Data 360
- ✓ Connect Claude Code, Cursor, or Codex to your org with hosted MCP
- ✓ Build in the browser with the Agentforce Vibes IDE - no setup required

Sign up for your Developer Edition

A free Salesforce Platform environment with Agentforce and Data 360

First name	Last name
SANTHOSH	T
Job title	Company
developer	Government thirumagal ...
Country/region	Work email
India	santhoshtirumalai01@...

☐ I agree to the [Main Services Agreement – Developer Services](#), [Salesforce Program Agreement](#), and [API Terms of Service](#)

Your free trial may be provisioned on or migrated to Hyperforce, Salesforce's public cloud infrastructure.

I acknowledge, as described in the Developer Documentation: (1) the Developer Edition includes autonomous and other generative AI features; and (2) Salesforce may limit use of

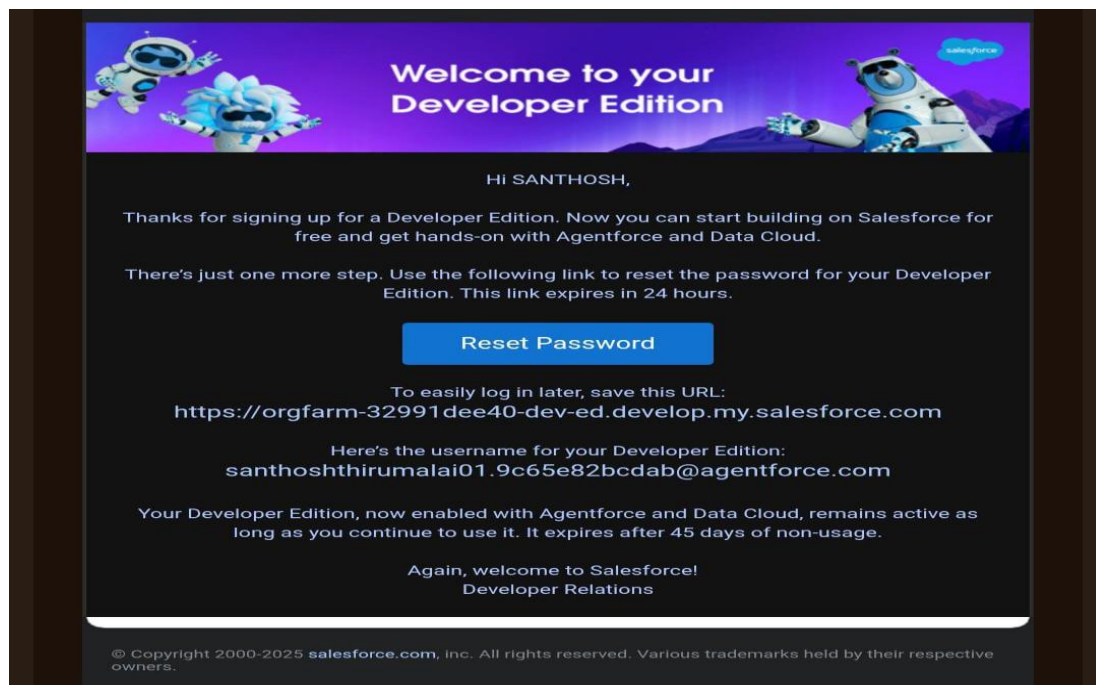

- 1) First name & Last name
- 2) Email
- 3) Role : Developer
- 4) Company : College or Company Name
- 5) County : India
- 6) Postal Code : pin code
- 7) Username : should be a combination of your name and company This need not be an actual email id, you can give anything in that format :

username@organization.com

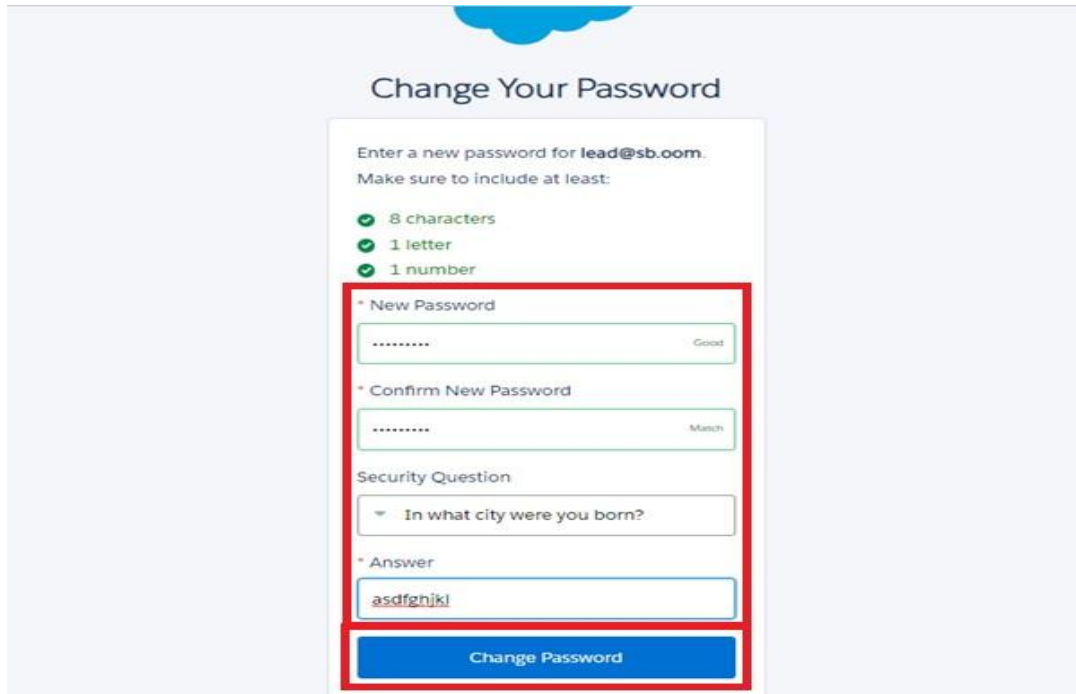

Click on sign me up after filling these.

Activity 2: Account Activation :

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may 5-10mins.

2. Click on Verify Account.
3. Give a password and answer a security question and click on change password.

The image shows a web form titled "Change Your Password" for the email address lead@sb.oom. The form includes instructions on password requirements (8 characters, 1 letter, 1 number) and a list of security questions. The "New Password" field is marked "Good", the "Confirm New Password" field is marked "Match", and the "Answer" field contains the text "asdfghjkl". A red rectangular box highlights the "New Password", "Confirm New Password", "Security Question", "Answer", and "Change Password" button sections. The "Change Password" button is a blue rectangle at the bottom of the form.

Change Your Password

Enter a new password for lead@sb.oom.
Make sure to include at least:

- ✓ 8 characters
- ✓ 1 letter
- ✓ 1 number

* New Password
..... Good

* Confirm New Password
..... Match

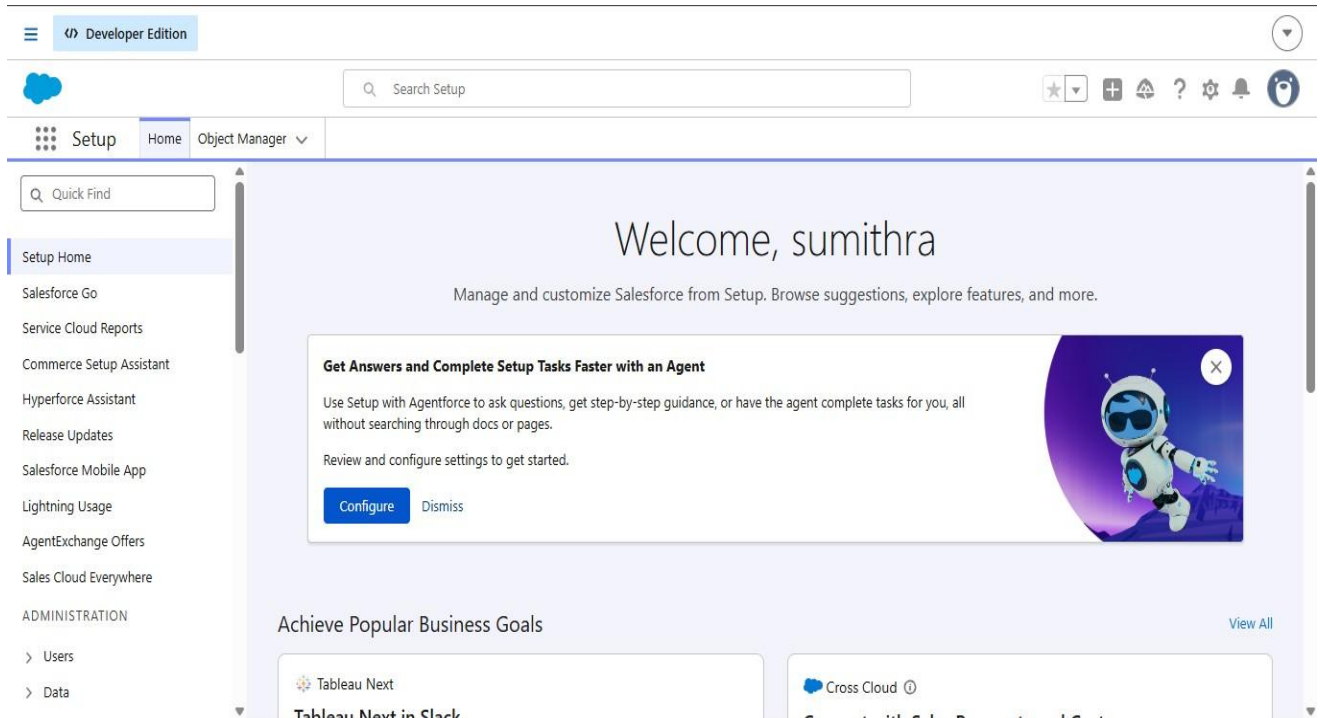

Security Question
▼ In what city were you born?

* Answer
asdfghjkl

Change Password

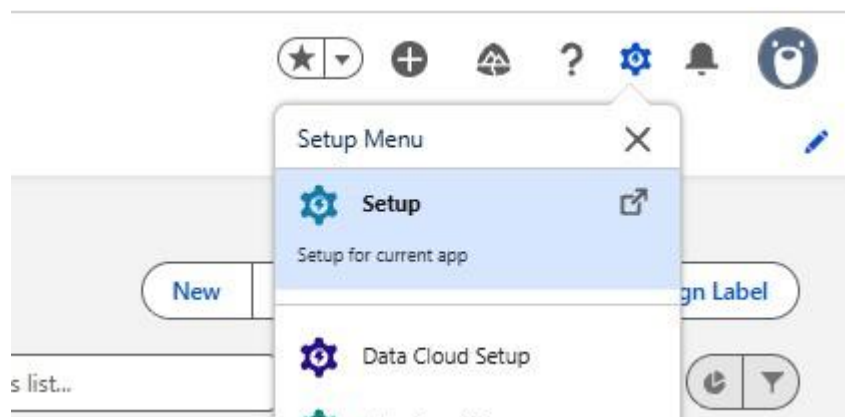

4.

5. Then you will redirect to your salesforce setup page.

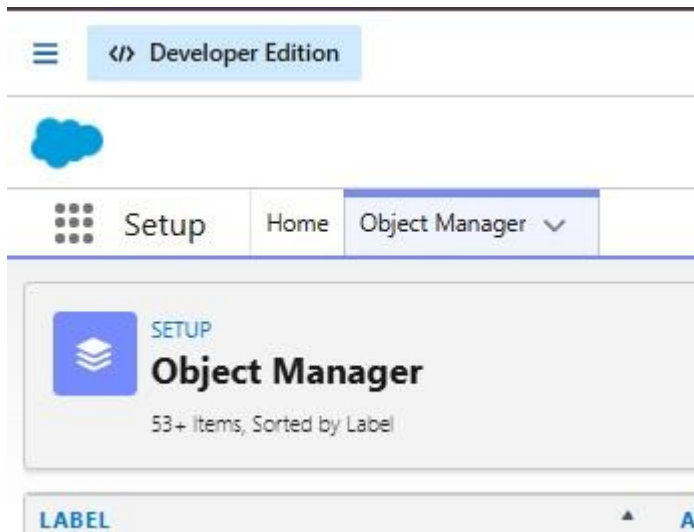

Milestone 2 - Objects

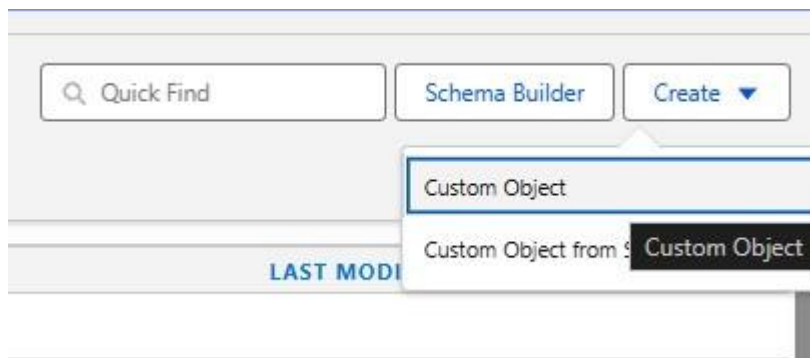

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.

2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.

3. On the Object Manager page, click Create | Custom Object.

Activity 1 : Employer Account Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.

- **Label** : Employer Account
- **Plural Label** : Employer Accounts
- Enter Record Name Label and Format

Record Name : Employer Account Name Data

Type : Text
- **In Optional features** : check the boxes for Allow Reports | Allow Activities | Track Field History.
- **Search Status** : check the box for Allow Search.

- Save

Activity 2 : Customer Account Object

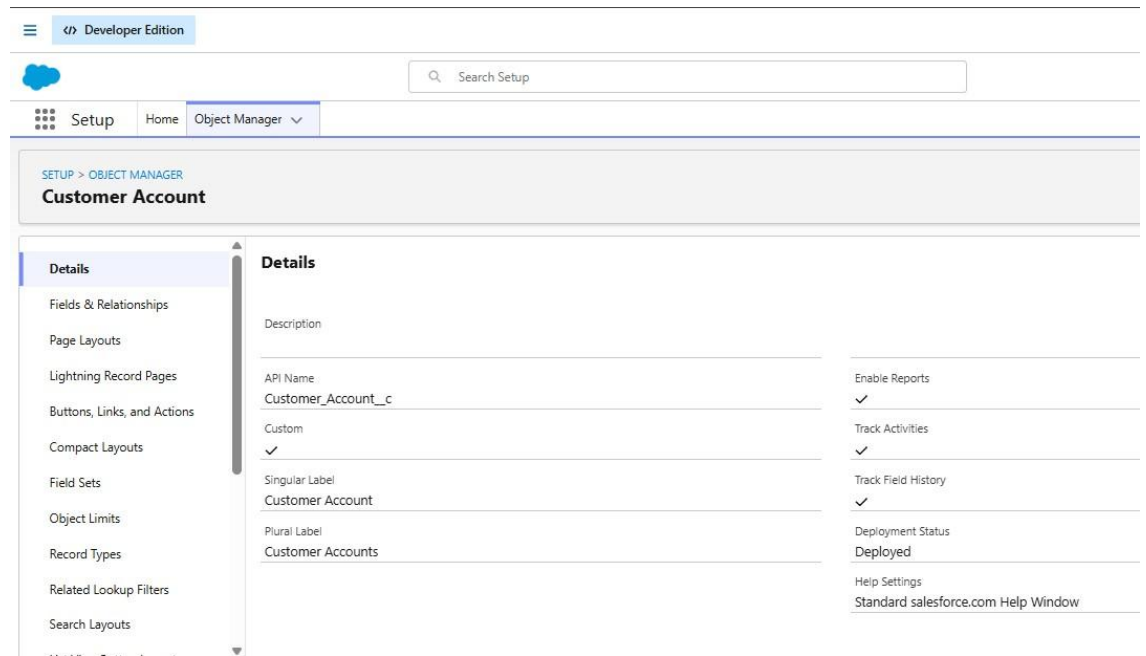

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.

- **Label** : Customer Account
- **Plural Label** : Customer Accounts
- Enter Record Name Label and Format

Record Name : Customer Account Name Data

Type : Text

- **In Optional features** : check the boxes for Allow Reports | Allow Activities | Track Field History.
- **Search Status** : check the box for Allow Search. • Save

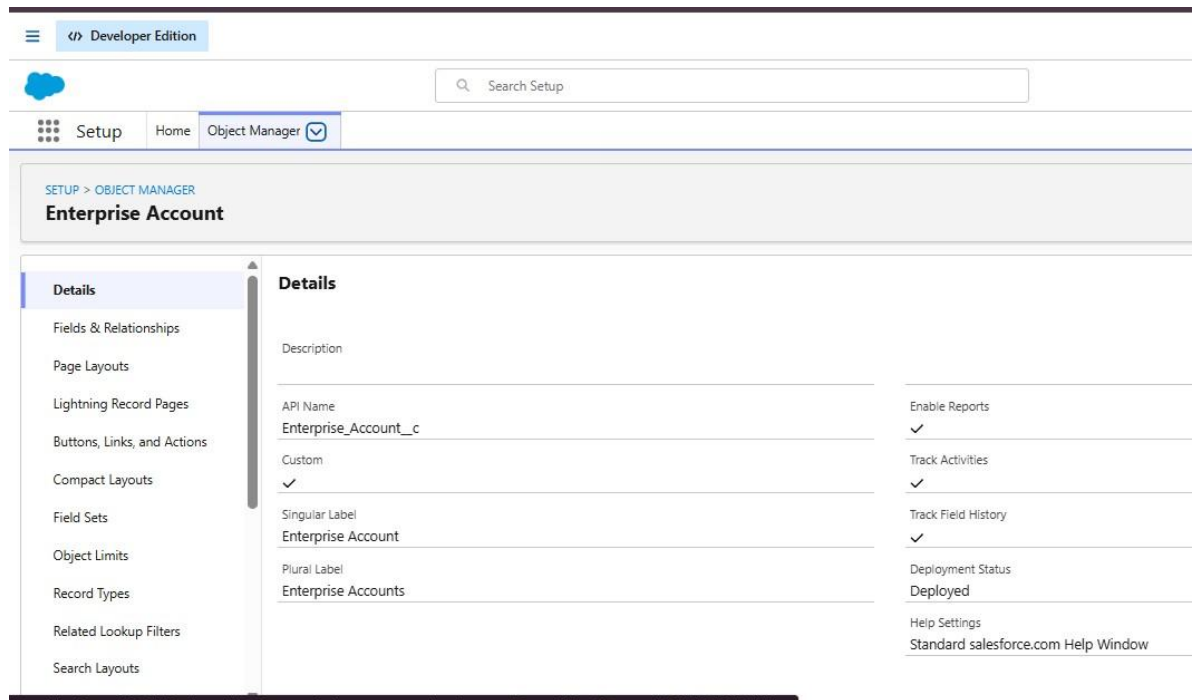

Activity 3 : Enterprise Account Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.

- **Label** : Enterprise Account
- **Plural Label** : Enterprise Accounts
- Enter Record Name Label and Format

Record Name : Enterprise Account Name Data

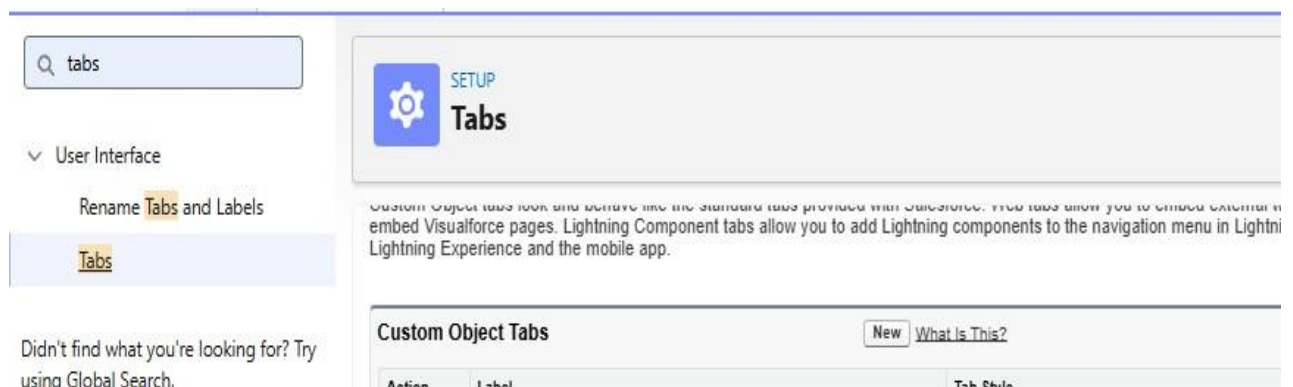

Type : Text
- **In Optional features** : check the boxes for Allow Reports | Allow Activities | Track Field History.
- **Search Status** : check the box for Allow Search.
- Save

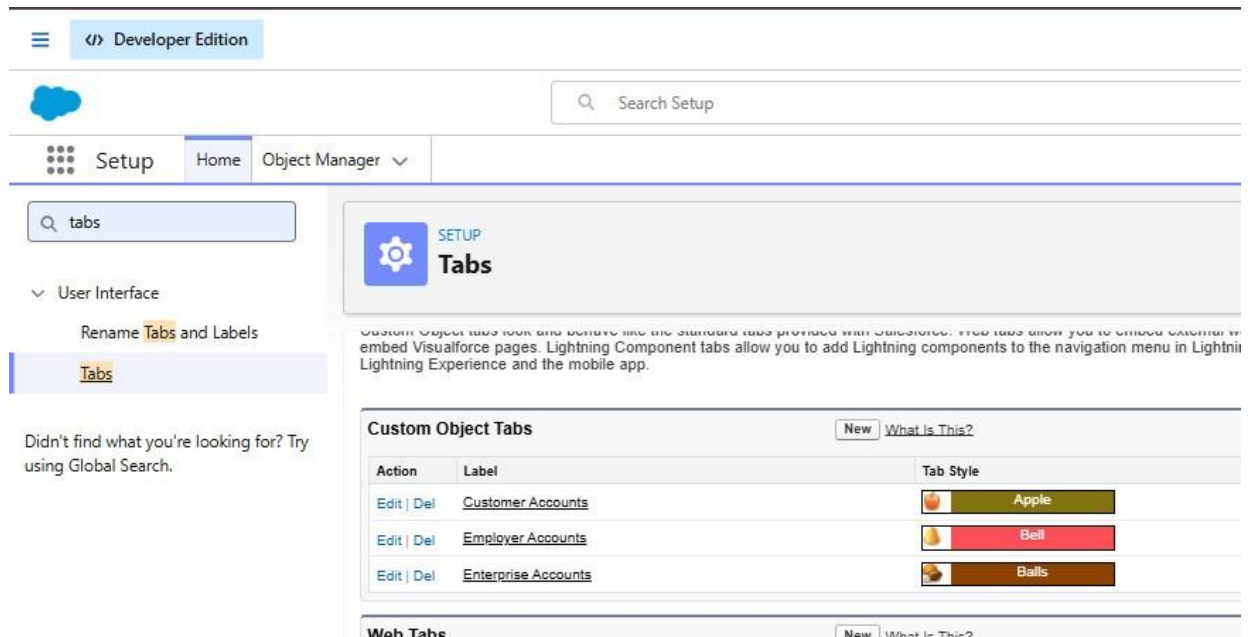

Milestone 3 - Tabs

Activity 1 : Custom tabs creation

1. Go to setup page → type Tabs in Quick Find bar → click on tabs → New (under custom object tab)

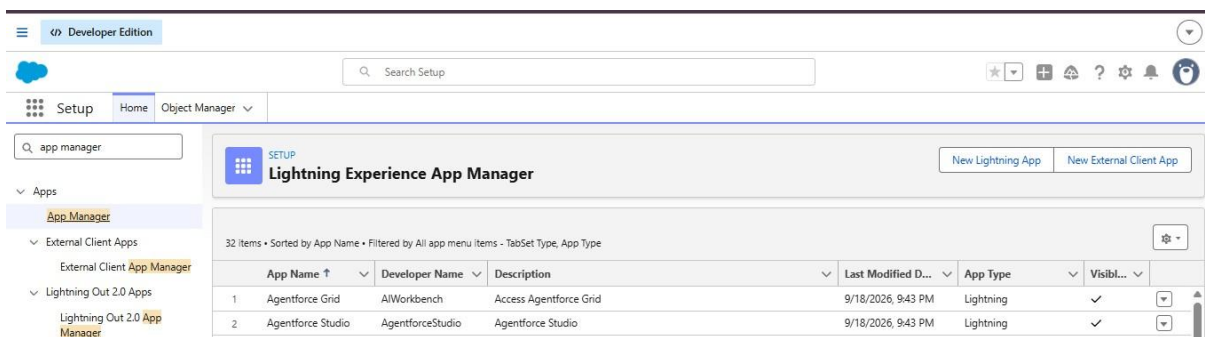

2. Select Object(Employer Accounts) → Select the tab style → Next (Add to profiles page) keep it as default → Next (Add to Custom App) uncheck the include tab .
3. Make sure that the Append tab to users' existing personal customizations is checked.
4. Click save.
5. Repeat the same steps for Customer Accounts and Enterprise Accounts.

Milestone 4 - The Lightning App

Activity 1 : Create a lightning app

1. Go to setup page → search “app manager” in quick find → select “app manager”
→ click on New lightning App.

2. Fill the app name in app details and branding as follow App

Name : TheChaiShop&Co

Developer Name : Auto Populates

Add image optional (if you want to give any image you can otherwise not mandatory) -

Add Primary color Hex or leave it to default.

Then click Next.

Activity 1 : Create Custom fields for Employer Account

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.
2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.
3. From the object manager page, In the Quick Find box, Search for the custom object you just created : **Employer Account**
4. From the sidebar, click Fields & Relationships. Notice that there are already some fields there. Those are the standard fields.
5. Click New to create a custom field. Tip: Before creating a new field, do a quick search to make sure a similar one doesn't already exist.

6. Next, choose a data type as Text. Choosing a data type helps you format the field input.

7. Click on next.

The screenshot shows the 'New Custom Field' wizard in Salesforce. The title is 'Employer Account New Custom Field'. There's a 'Help for this Page' link. The wizard is at 'Step 2. Enter the details' of 4 steps. At the top right, there are 'Previous', 'Next', and 'Cancel' buttons. The 'Next' button is highlighted. Below the buttons, there are input fields for 'Field Label' (containing 'First Name'), 'Length' (containing '25'), and 'Field Name' (containing 'First_Name'). There's a description field at the bottom. A message above the 'Length' field says 'Please enter the maximum length for a text field below.'

10. Data Type : **Picklist** Field

Label : Payment Mode

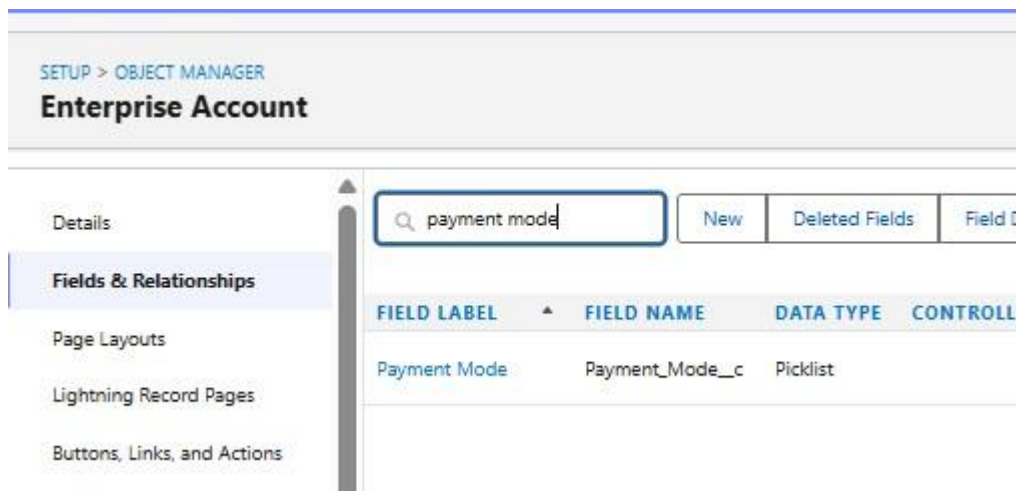

Values : Use **Global Picklist** value set and select

Payment Mode from the dropdown menu. Field

Name : Auto Populates.

Required : Check the box

Click on Next → Next → Save.

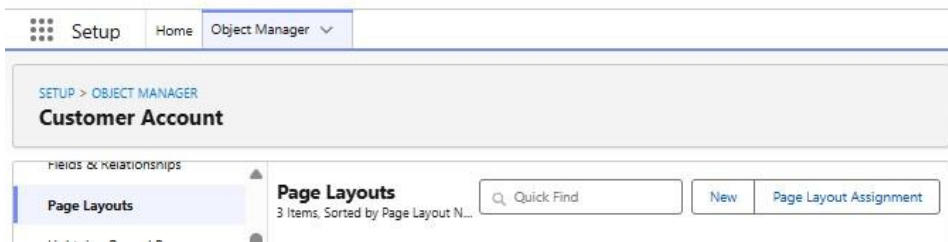

Milestone 7 : Page Layouts

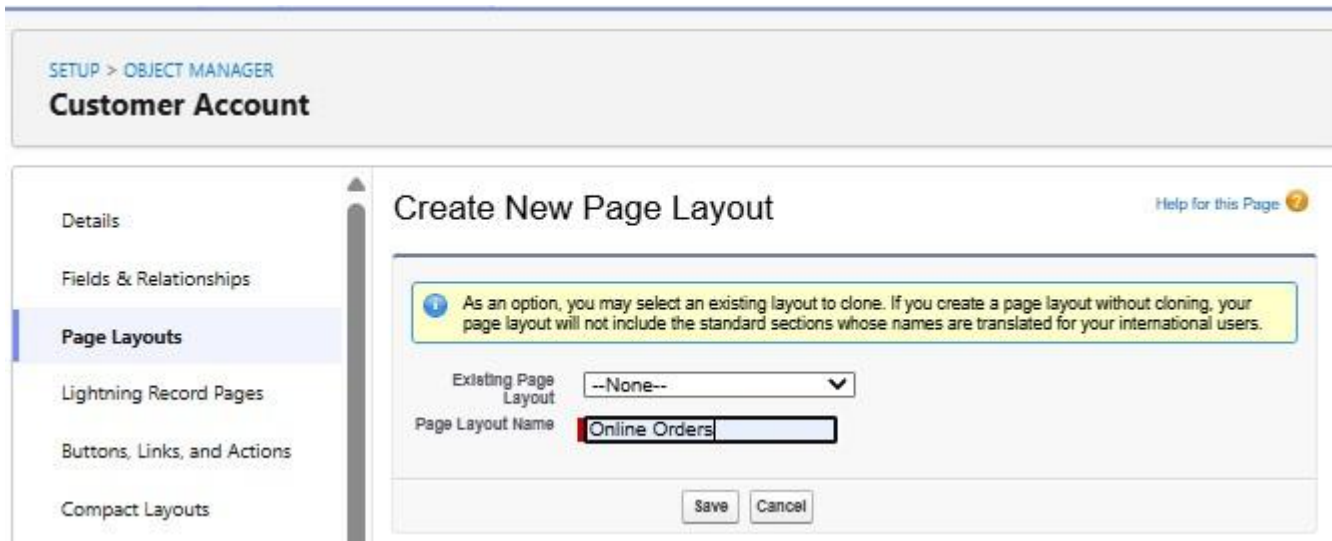

For the personalized field view in Customer Accounts, let's create two page layouts Online orders and Walk-In orders.

Activity 1: Online Orders page layout

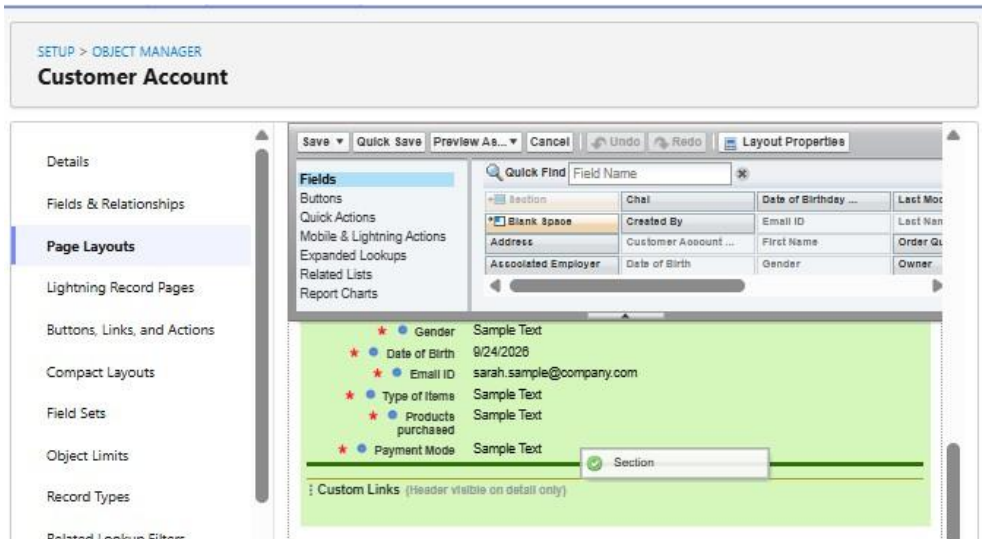

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.
2. Click on the Page Layouts → click New.

3. Page Layout Name : Online Orders and click Save.

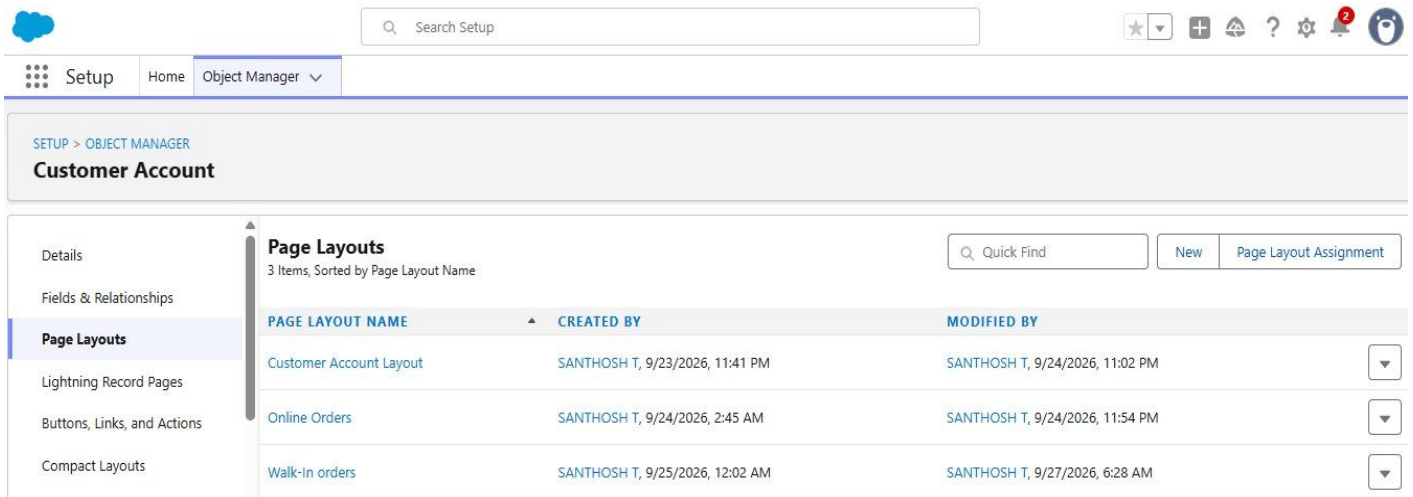

4. Drag and Arrange all the required fields as shown below.

5. Click **Save**.

Activity 2: Walk-In Orders page layout

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.
2. Click on the Page Layouts → click New.
3. Page Layout Name : Walk-In orders and click save.
4. Drag and Arrange all the required fields as shown below.
5. Click **Save**.

The screenshot shows the Salesforce Setup interface. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. The breadcrumb trail is 'SETUP > OBJECT MANAGER'. The main heading is 'Customer Account'. On the left sidebar, 'Page Layouts' is selected. The main content area shows a table of Page Layouts for the Customer Account object.

PAGE LAYOUT NAME	CREATED BY	MODIFIED BY
Customer Account Layout	SANTHOSH T, 9/23/2026, 11:41 PM	SANTHOSH T, 9/24/2026, 11:02 PM
Online Orders	SANTHOSH T, 9/24/2026, 2:45 AM	SANTHOSH T, 9/24/2026, 11:54 PM
Walk-In orders	SANTHOSH T, 9/25/2026, 12:02 AM	SANTHOSH T, 9/27/2026, 6:28 AM

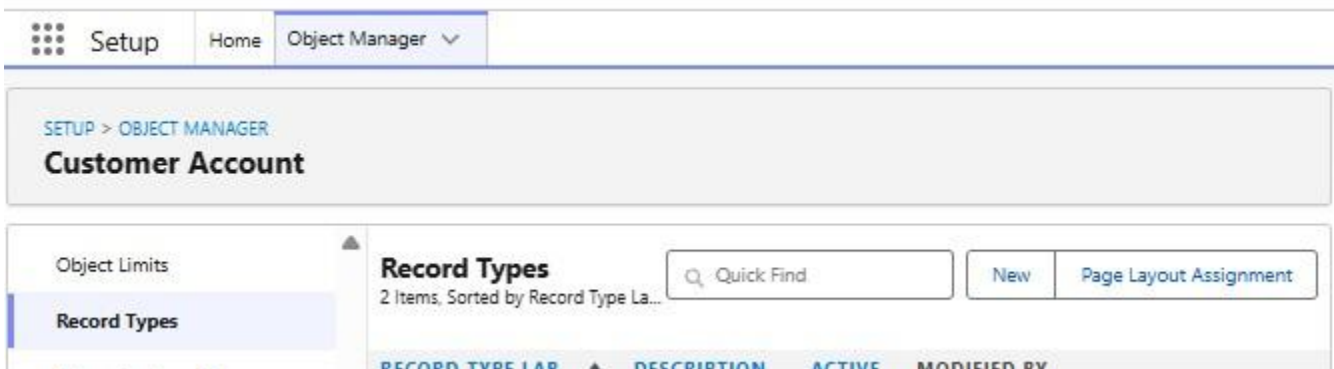

Milestone 8 - Record Types

To Differentiate the records and data stored in Customer Accounts, let's create two different Record Types.

Online orders and Walk-In orders.

Activity 1: Online Orders Record Type

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.
2. Click on the Record Types → click New.

The screenshot shows the Salesforce Setup interface. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. The breadcrumb trail is 'SETUP > OBJECT MANAGER'. The main heading is 'Customer Account'. On the left sidebar, 'Record Types' is selected. The main content area shows a table of Record Types for the Customer Account object.

RECORD TYPE LABEL	DESCRIPTION	ACTIVE	MODIFIED BY
Master Record			

3. Enter Details :

Existing Record Type : Master Record

Type Label : Online Order

Record Type Name : Auto Populates

Active : Tick the checkbox

Click Next

The screenshot shows the 'New Record Type' setup page for 'Customer Account'. The left sidebar contains navigation links: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types (selected), and Related Lookup Filters. The main content area is titled 'New Record Type Customer Account' and includes a 'Help for this Page' link. It features a progress bar with 'Step 1 of 2' and a section titled 'Step 1. Enter the details'. Below this, a text box explains that the new record type will include all picklist values from the existing record type. The 'Record Type' section includes a dropdown for 'Existing Record Type' (set to '--Master--'), text boxes for 'Record Type Label' (online order), 'Record Type Name' (online_order), and 'Description'. The 'Active' checkbox is checked.

4. In Assign Page Layouts

The screenshot shows the 'Assign Page Layouts' section. It contains a text box stating: 'Select the page layout that users with this profile see for records with this record type. After saving, choose the picklist values that are available with this record type.' Below this, there are two radio buttons: 'Apply one layout to all profiles' (selected) and 'Apply a different layout for each profile'. To the right of the radio buttons is a dropdown menu showing 'Online Orders'.

Select

Apply one layout to all profiles : select **Online orders** from the drop down menu.

5. Click **Save and New**.

Activity 2: Walk-In Orders Record Type

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.
2. Click on the Record Types → click New.

3. Enter Details :

Existing Record Type : Master Record

Type Label : Walk-In Order Record

Type Name : Auto Populates Active :

Tick the checkbox

Click Next

4. In Assign Page Layouts

- Select Apply one layout to all profiles : select **Walk-In orders** from the drop down menu.

5. Click **Save**.

The phone number must consist of exactly 10 digits. The phone number must contain only numeric digits (no spaces, dashes, parentheses, etc.)

4. Click Save.

The screenshot shows the 'Enterprise Account Validation Rule' configuration page in Salesforce. The left sidebar contains a navigation menu with options: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, and Search Layouts. The main content area is titled 'Enterprise Account Validation Rule' and includes a 'Back to Enterprise Account' link. Below the title is the 'Validation Rule Detail' section with 'Edit' and 'Clone' buttons. The rule is named 'Phone_Number' and is active. The 'Error Condition Formula' is: `AND( NOT(ISBLANK( Phone_Number__c )), NOT(REGEX( Phone_Number__c , "{1-9}(10)$")), NOT(REGEX( Phone_Number__c , "^[0-9]+$")) )`. The 'Error Message' is: 'The phone number field must not be blank. The phone number must consist of exactly 10 digits. The phone number must contain only numeric digits (no spaces, dashes, parentheses, etc.)'. The 'Error Location' is 'Top of Page'. The 'Description' is empty. The 'Created By' is 'sumithra R' on '9/23/2026, 11:04 AM' and the 'Modified By' is also 'sumithra R' on '9/23/2026, 11:04 AM'. There are 'Edit' and 'Clone' buttons at the bottom of the rule details.

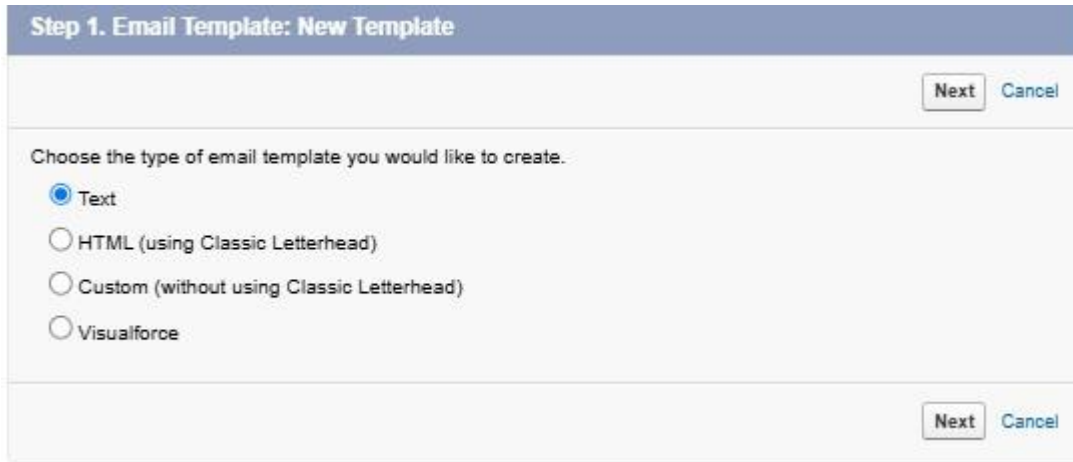

Milestone 10 - Email Template

Activity 1: Email Template

1. Go to setup, In quick find box enter Email template → click on classic Email Template.
2. Click on→ New Email Template
3. \

The screenshot shows the Salesforce Setup page. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. A search bar contains 'email templa'. The left sidebar shows a search result for 'Email' with 'Classic Email Templates' and 'Lightning Email Templates' listed. The main content area is titled 'Classic Email Templates' and includes a 'New Template' button. Below the button is a table with columns: Action, Email Template Name, Template Type, Available For Use, Description, Author, and Last Modified. The table is currently empty.

4. Choose the type of email template you would like to create : **Text** and click **Next**.

Step 1. Email Template: New Template

NOTE :

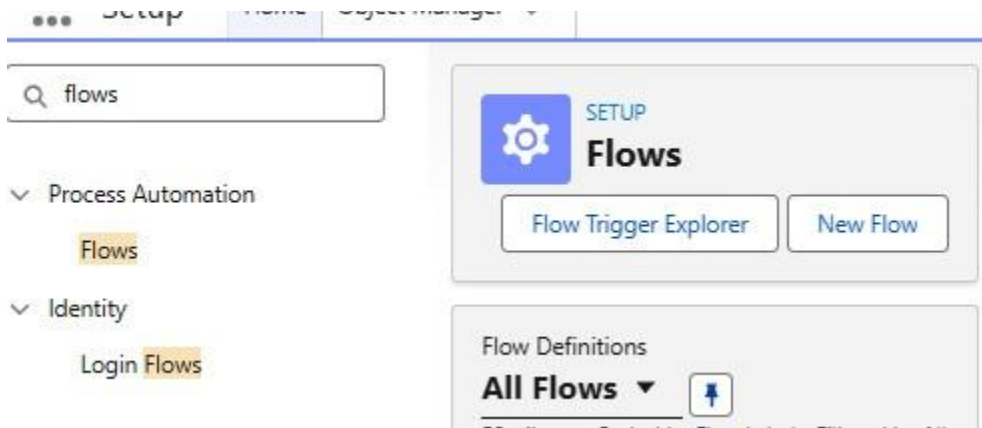

1. Make sure that the Default workflow user is assigned.

Milestone 11 - Flows

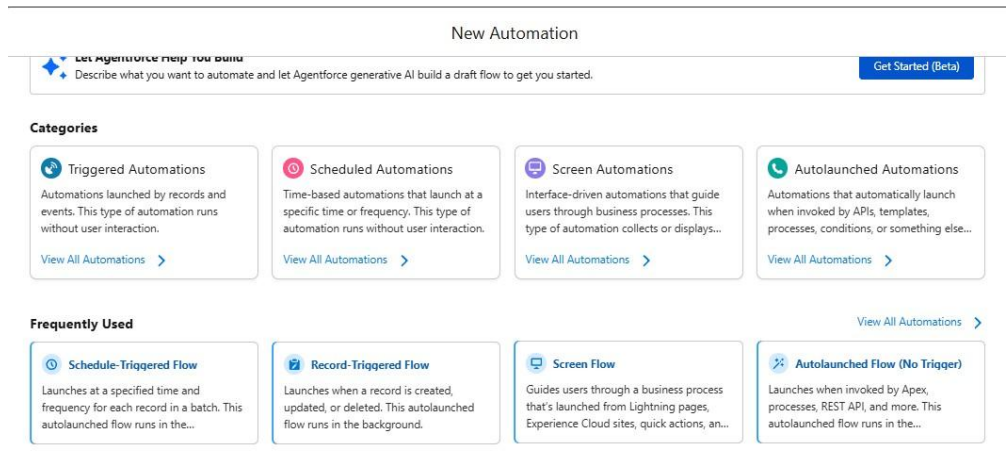

Let's create a scheduled Triggered flow to automate the Birthday offer mails.

Activity 1: Schedule Triggered Flow

1. Go to setup, Type Flow in quick find box → Click on the Flow and Select the New Flow.

2. Select Schedule - Triggered Flow and click Create.

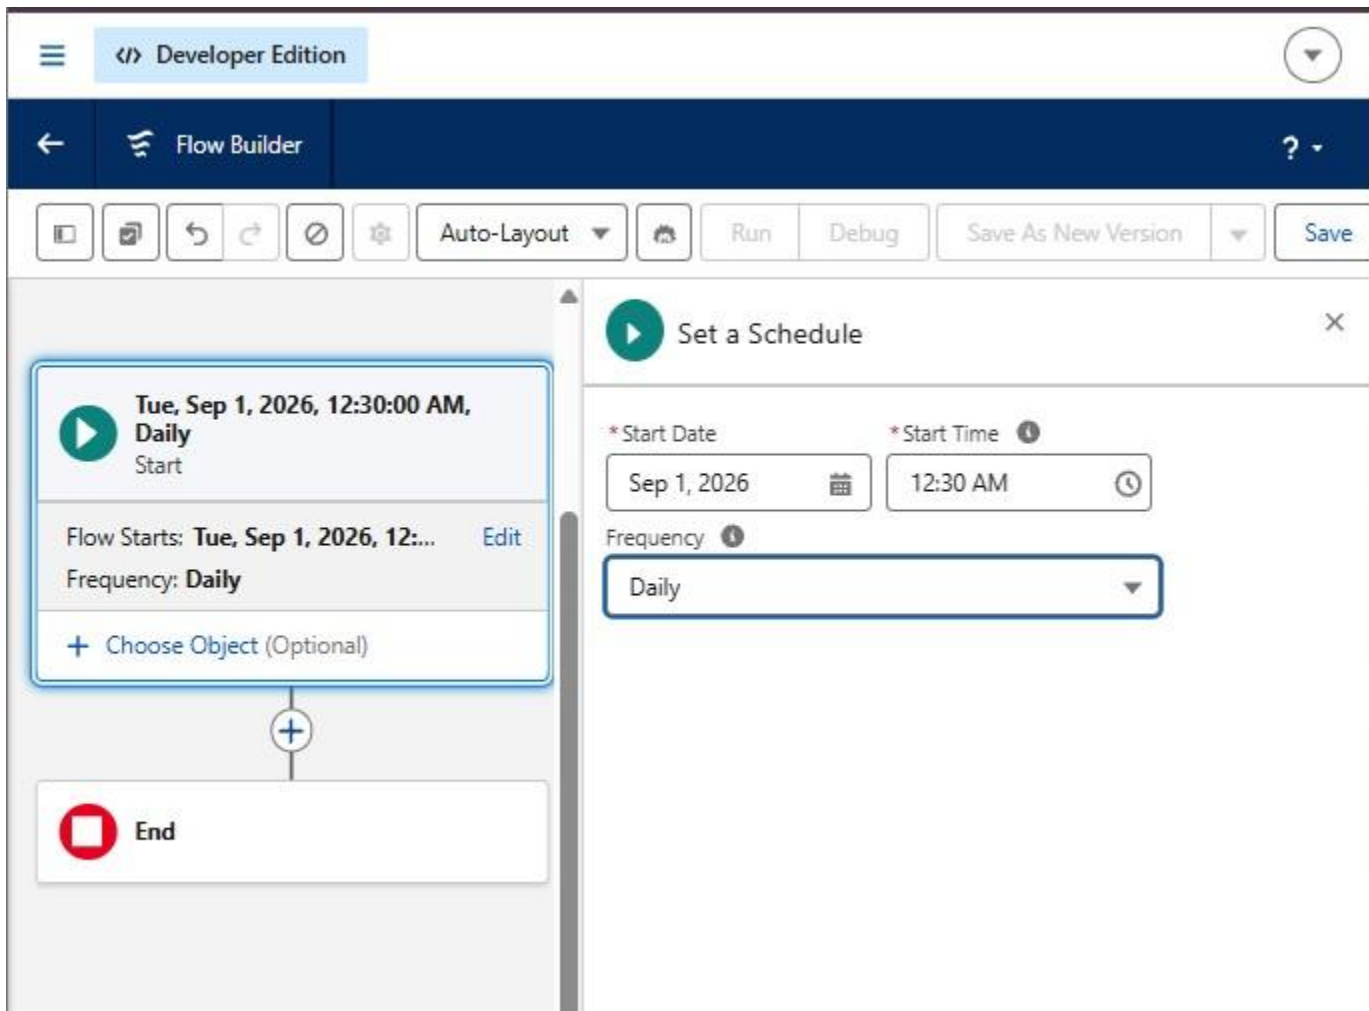

3. Set a Schedule

Start Date : Enter the Date, when you want to start the flow. Start

Time : Enter the Time, when you want to start the flow. Frequency :

Daily

4. *Create Object*

Object : Customer Account

Condition Requirements : All conditions Are Met (AND)

- Field : Date_of_Birthday_is_today__c
Operator : Equals
Value : \$GlobalConstant.True
- Field : Email_ID__c
Operator : IS NULL
Value : \$GlobalConstant.False

5. Click (+) Icon on the flow builder and Select **Action Component**.

The screenshot displays the Salesforce Flow Builder interface. The top navigation bar includes 'Developer Edition' and 'Flow Builder'. The main canvas shows a flow starting with a 'Start' event (labeled 'Mon, Sep 7, 2026, 12:30:00 AM, Daily') followed by an 'End' event. A plus icon (+) is visible between the two events. On the right, the 'Choose Object and Filter Conditions' panel is open, showing the object 'Customer Account' and two conditions: 'Date of Birthday is today ?' (Equals, True) and 'Email ID' (Is Null, False). The 'Add Element' panel on the left shows a search bar and a list of elements under 'Interaction' (Action, Subflow) and 'Logic' (Assignment, Decision, Wait for Conditions). The 'Action' element is selected.

6. In New Action Page

Filter By : Type and select Email Alert

In Action : Search and select Happy Birthday email alert

Label : Send Happy Birthday Email

API Name : Auto Populates

Set Input Values for the Selected Action : Record ID : {!\$Record.Id}

The screenshot displays a workflow editor interface. On the left, a vertical flowchart shows a sequence of steps: a connector with a plus sign, followed by a step labeled 'send happy birthday email' with an email icon and 'Email Alert' subtitle, another connector with a plus sign, and finally an 'End' step with a red square icon. Above the flowchart, the frequency is set to 'Daily', the object is 'Customer Account', and there are '2' conditions. An 'Edit' link is visible. Below the flowchart are zoom controls. On the right, a configuration panel for the 'send happy birthday email' step is open. It has a title bar with a back arrow, an email icon, the title 'Happy Birthday email alert', and a close button. The panel includes a field for '* API Name' with the value 'send_happy_birthday_email', a 'Description' field, and a section titled 'Set Input Values' with a note: 'Use values from earlier in the flow to set the inputs for the use its outputs later in the flow, store them in variables.' Under this section, there is a field for '* Record ID' with a value 'A_a ... Customer_Account_c > Record ID'. At the bottom of the panel is a link '> Show advanced options'.

MILESTONE 12 – CONCLUSION

In conclusion, the development of **TheChaiShop&Co CRM Application** marks a significant stride in enhancing the store's operational efficiency and customer relationship management capabilities.

Seamlessly integrating employer details, customer information (both online and offline), and enterprise data, this application streamlines business processes and enables informed decision-making.

The automation of sales calculations, including order quantity and total bill amount, reduces errors and empowers employees to focus on delivering exceptional service. Moreover, automated email notifications for customers' birthdays foster personalized communication and enhance customer engagement.

1. FUNCTIONAL & PERFORMANCE TESTING

During the testing phase, screenshots were captured from the **Salesforce Lightning interface** to verify correct system behavior. These include:

- Record creation for **Employer, Customer, and Enterprise** objects.
- Validation rule testing for **Aadhar, PAN, and phone numbers**.
- Verification of **record types and page layouts**.
- Formula field validation for **order quantity and billing**.
- Flow execution for **birthday email alerts**.
- **Report and dashboard** generation.

Performance testing ensured **fast response time and system stability during concurrent usage**.

2. ADVANTAGES & DISADVANTAGES

Advantages

- Centralized data management
- Reduced manual work
- Automated calculations
- Improved customer engagement
- Real-time analytics

Disadvantages

- Requires Salesforce license
- Internet dependency
- Limited offline access

3. CONCLUSION

The **CRM Application for TheChaiShop&Co** successfully improves business operations by integrating customer data, automating billing, and enabling intelligent reporting.

The system reduces errors, saves time, and enhances customer relationships through automation and analytics.

4. FUTURE SCOPE

The future scope of the CRM application includes:

- Mobile CRM integration
- AI-based sales prediction
- WhatsApp/SMS alerts
- Inventory management
- Multi-branch support
- Advanced customer profiling
